

Rodent tracking rates - Cobb 2021-2026

AVGRat Index AVGMouse Index

Search name: Search not saved

Start date: 01/01/2021

End date: 06/08/2026

SubSurvey name: Rodent 1 day

Integrity Score: 0.600

Note:

- The x-axis represents actual or mean date set of monitoring lines.
- Data points in the graph are joined by lines if measurements were undertaken in consecutive date groups.
- To copy the graph from the PDF, right-click on image.
- The Integrity Score is a measure of the consistency with which different TT lines contribute to a time series. A time series comprised of the exact same lines every survey has high integrity (1), whereas one with different lines contributing to different data points has lower integrity. Scores of 0.8 or more are generally considered 'High'.
