

6. Acknowledgements

We thank the landowners who cooperated with this survey; in particular, those who cheerfully provided access on to their properties.

The introductory section of this report relies heavily on PNAP material written by Linda Conning, the author of several preceding PNAP reports published by DOC's Northland Conservancy.

During the survey period and original drafts, Peter Anderson and Linda Conning provided significant support and advice. Peter Anderson was a constantly positive and encouraging supervisor.

Geomorphological data was compiled and written by Dr. Fred Brook, who also provided advice and information on indigenous land snails.

In the earlier drafts, Ray Pierce (EcoOceania Ltd) provided advice and assistance with regard to fauna distribution, and Lisa Forester was frequently called upon for plant identification and botanical advice.

Ewen Cameron of Auckland Museum and Institute (AK) provided herbarium records.

Information on Queen Elizabeth II National Trust Open Space covenants was provided by Nick Matich and Nan Pullman, both regional representatives in Northland.

Comments on the final report was provided by Andrea Booth, (DOC Northland Conservancy), Andrew Townsend (DOC Northland Conservancy) and Tony McCluggage (DOC Northland Conservancy).

The maps were prepared in conjunction with Terry Conaghan, Andrew MacDonald and Loraine Wells with the final maps prepared by Andrew MacDonald in ArcView GIS for publication.
