

# Land Snails from the Wellington Region

These snail species were collected in pitfall-flight-intercept traps in the Wellington region in the summers of 2003/04 to 2005/06. The diversity shown is only about half of that found. They represent a small sample of the (probably) 2000 species occurring in New Zealand, of which only about 500 have been named. It is thought that New Zealand may have 3-5 times the snail diversity of most other countries in the world, when calculated on a per unit area basis. Names such as 'Punctidae SPP2K n. sp. 50' refer to the 'Species 2000 List' of currently unnamed species. Scale bar = 1 mm.

## Snail Species List

1. *Allodiscus tessellatus*
2. *Cavellia anguicula*
3. *Cavellia serpentinula*
4. *Cavellioropa subantialba*
5. *Charopa coma*
6. *Climocella maculata*
7. *Cytora kamura*
8. *Flammulina chiron*
9. *Flammulina feredayi*
10. *Flammulina zebra*
11. *Huonodon pseudoleiodon*
12. *Hydrocena purchasi*
13. *Laoma nerissa*
14. *Liarea lepida*
15. *Mitodon wairarapa*
16. *Mocella eta*
17. *Otoconcha dimidiata*
18. *Paracharopa bianca*
19. *Paralaoma miserabilis*
20. *Paralaoma sericata*
21. *Paralaoma serratocostata*
22. *Phenacobelix lucetta*
23. *Phrixgnathus phrynia*
24. *Pseudallodiscus ponderi*
25. Punctidae SPP2K n. sp. 50
26. Punctidae SPP2K n. sp. 69
27. Punctidae SPP2K n. sp. 199
28. *Suteria ide*
29. *Thalassobelix zelandiae*
30. *Tubuaia novoseelandica*
31. *Wainuia urnula*
