**Attachments:** Omori layout.pptx

Kia ora Lisa,

Yea good spotting, originally in the Contract we had proposed to build the treatment plant in the location as per the Principals requirements (in figure 4.1), however as per the application (see below) this didn't end up being suitable. So now we're seeking the concession to build it in the new site on Conservation land.

With regards to the pipelines; please see attached, TDC currently have a concession for the pipe to the reservoir and we'd just join into this pipe adjacent SH1, with a new Raw water pipe from the intake to the new site (as per the markup), the Raw water intake won't change and it's located on the lake front, near 115 Areta Lane

**Māori Trust land**

~~56 Rereahu Avenue Hatepe. Proprietors of Opawa Rangitoto 2G – This trust did not provide TDC with security of a long-term lease for a key Council asset.~~

Morena Elijah,

I am just going through your application to make sure that it contains everything we need for it to be publicly notified.

In doing this I note there are different locations showing between Figures 4.1 & 5.1 (preliminary Hatepe WTP concept layout / proposed location) in the Hatepe WTP Principal Requirements document and the Draft Site Layout – Sheet 1 & 2 that you have provided. See images below. I just wanted to check with you whether the Hatepe WTP Principal Requirements report is the correct one for this project and if so, has the different locations been contained in these documents been addressed within your application?

I also don't see any diagrams showing where and how the untreated water enters the TP and how and where it leaves the TP to reach the community. It would be good to understand the conveying water easement requirements and locations for this aspect. Do you have any other plans showing this?

Ngā mihi (*with thanks*)
