

Figure 1. Catch locations of seabirds killed during the period from 1 October 2000 to 30 September 2001, and returned for autopsy from New Zealand fisheries.

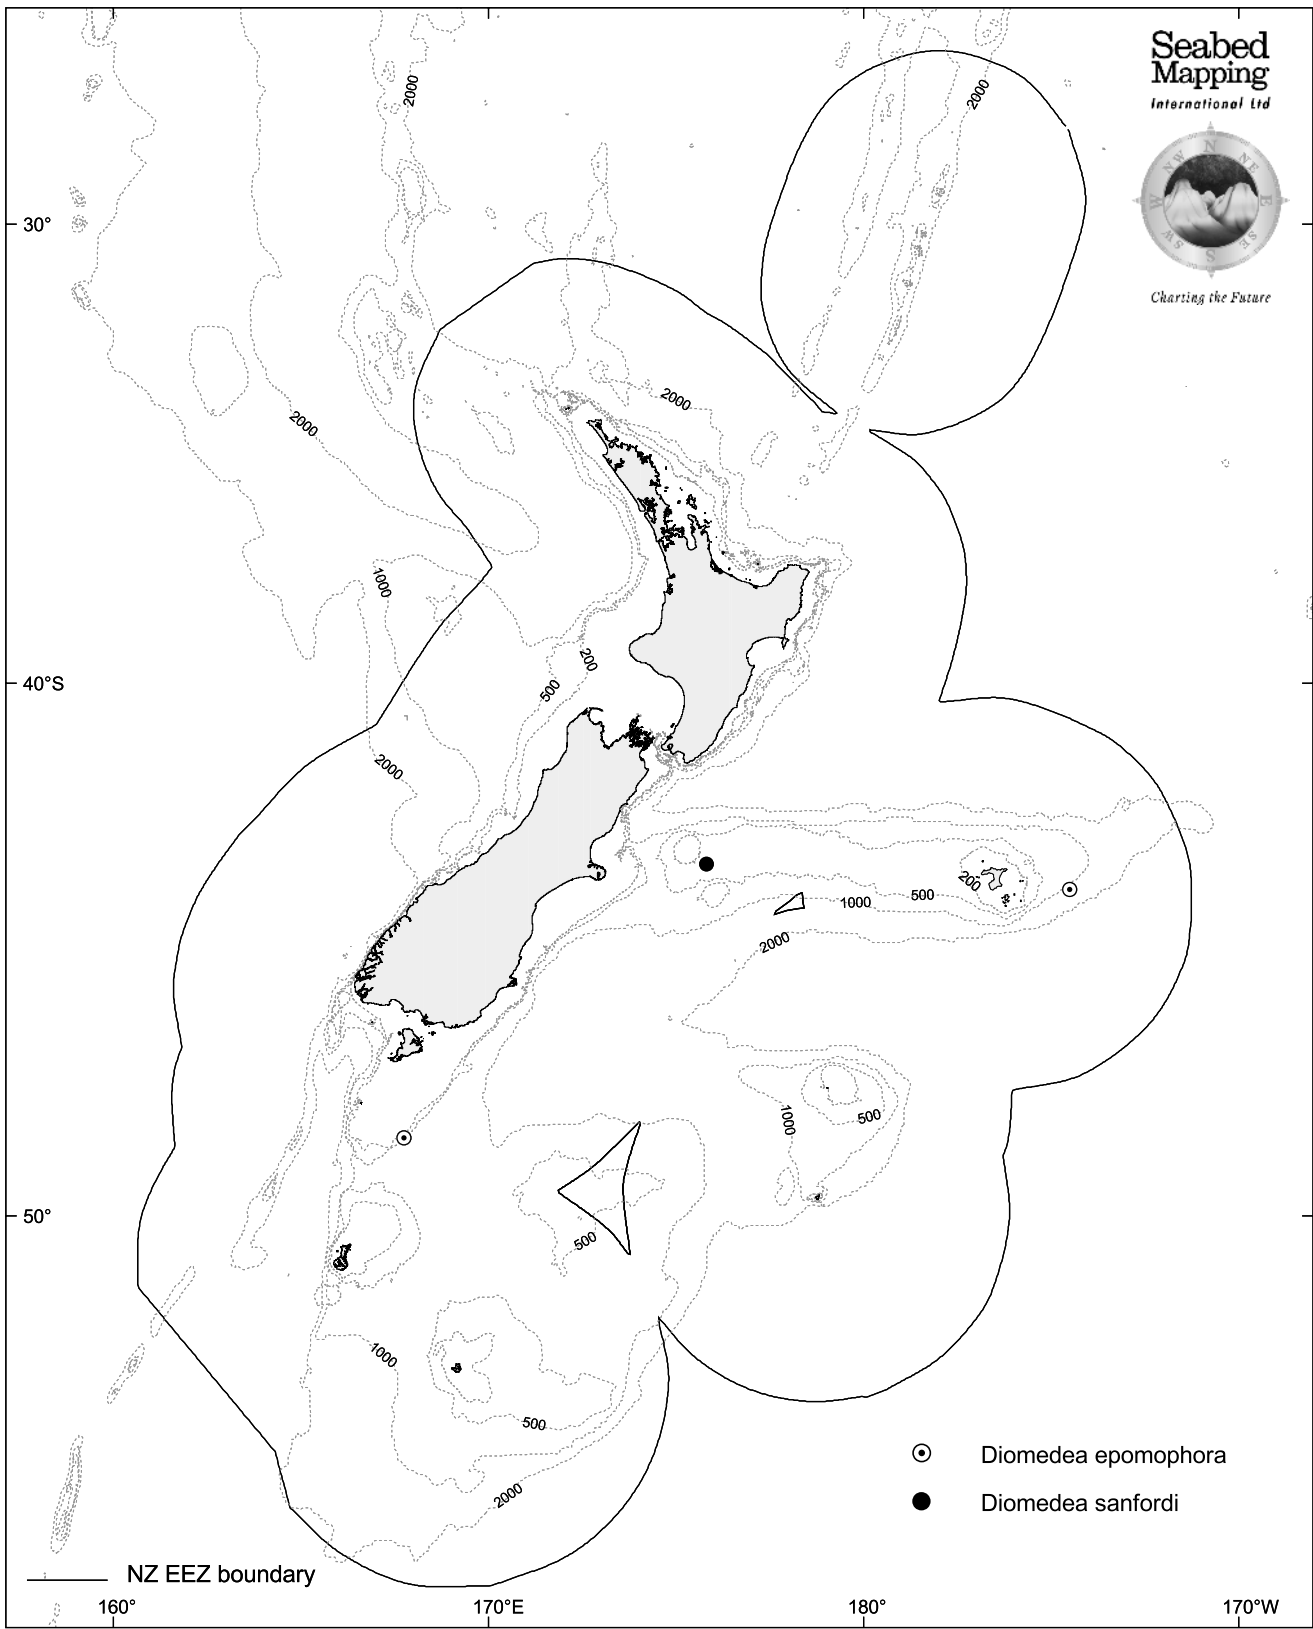

Figure 2. Catch locations during the period from 1 October 2000 to 30 September 2001, of *Diomedea* taxa returned for autopsy.

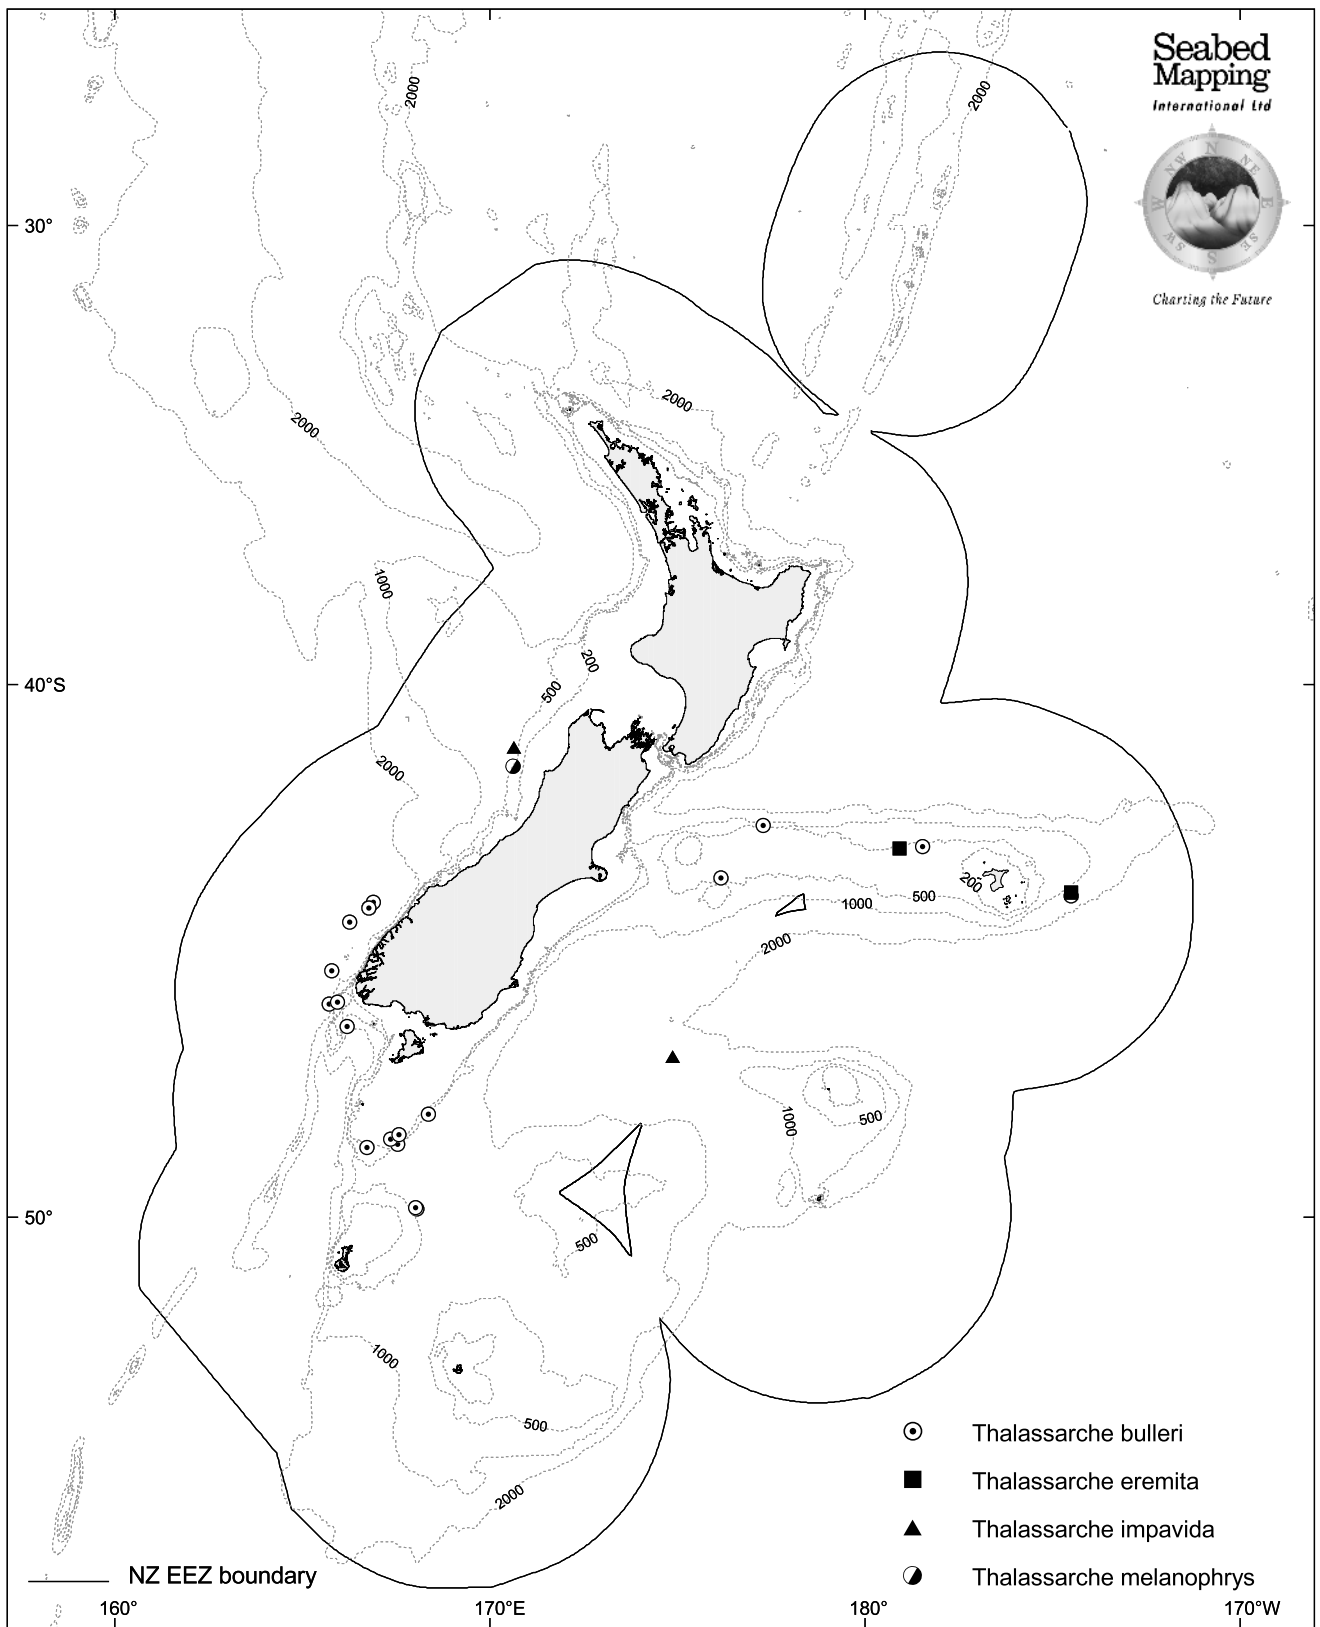

Figure 3. Catch locations during the period from 1 October 2000 to 30 September 2001, of four *Thalassarche* taxa returned for autopsy.

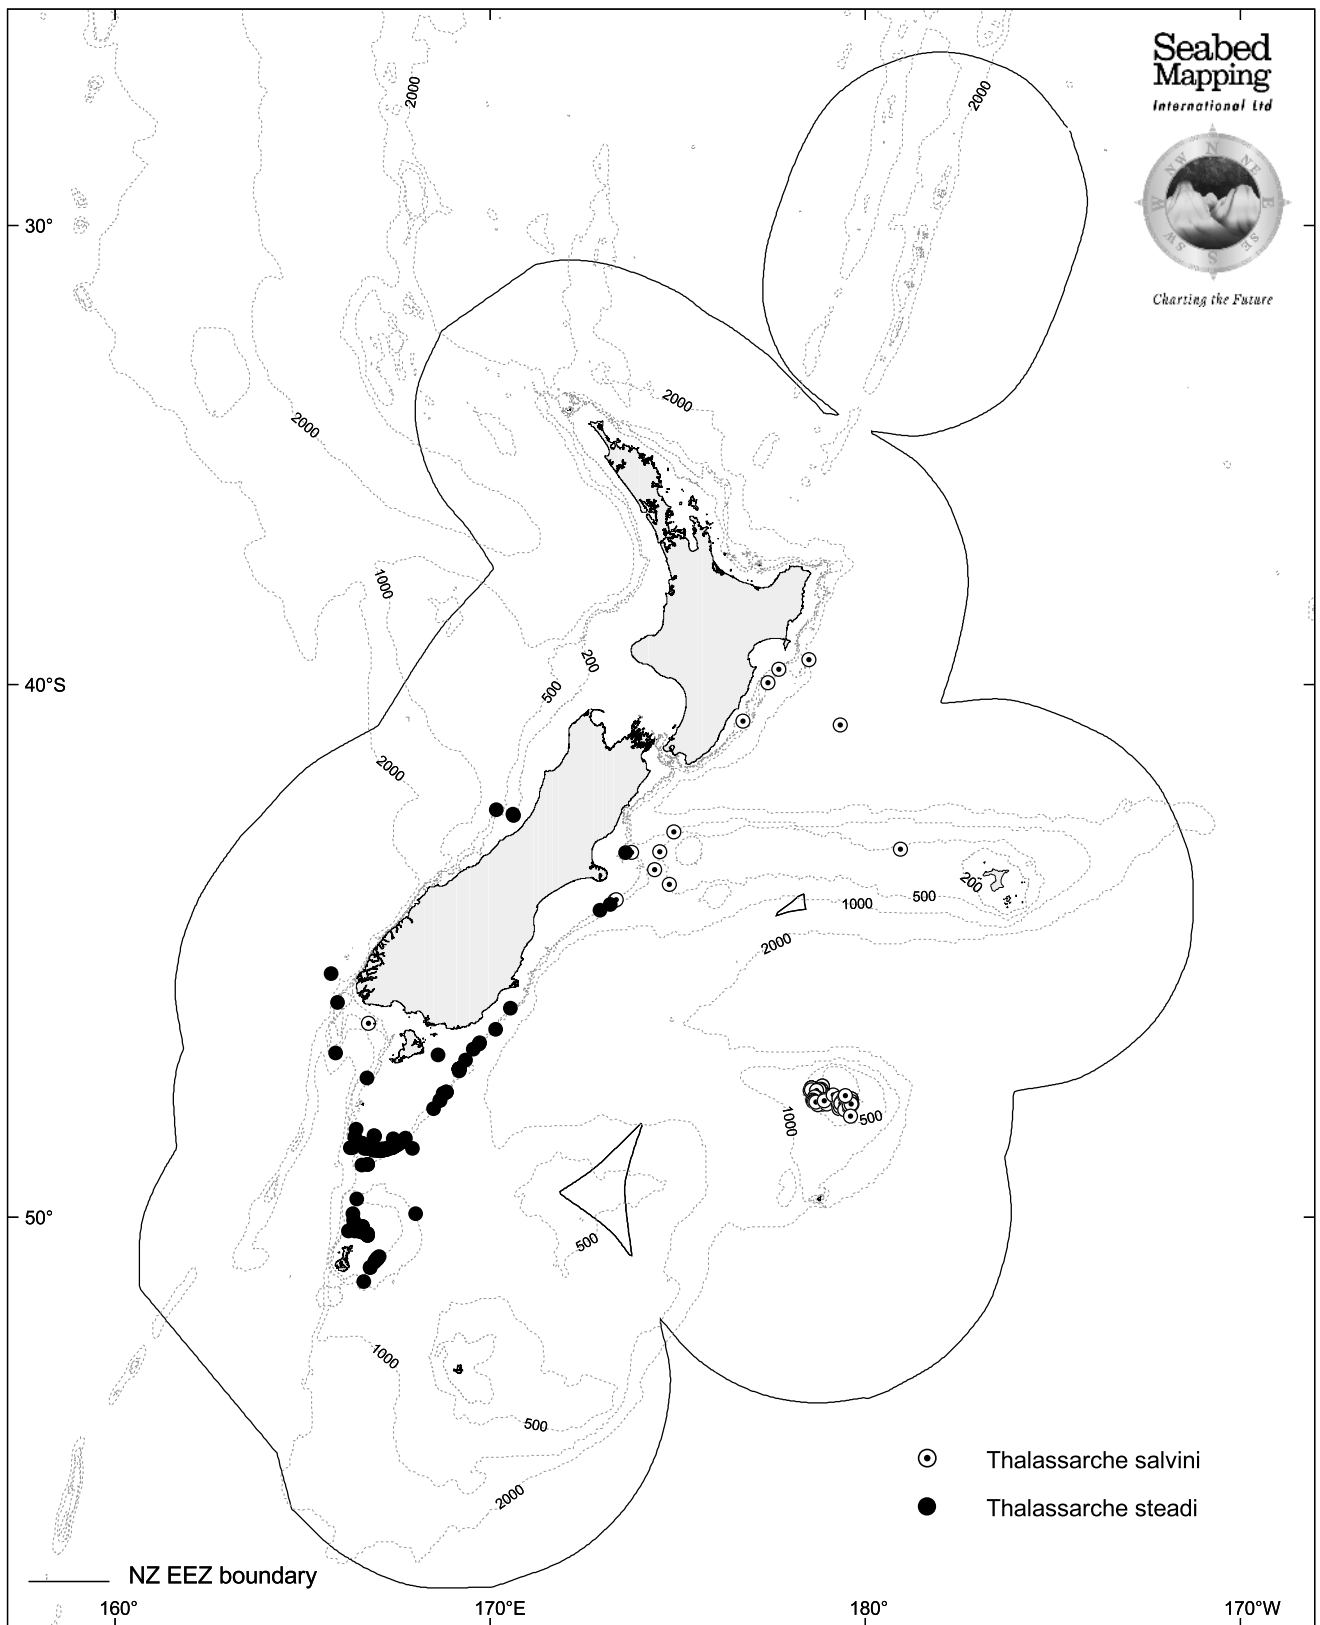

Figure 4. Catch locations during the period from 1 October 2000 to 30 September 2001, of two *Thalassarche* taxa returned for autopsy.

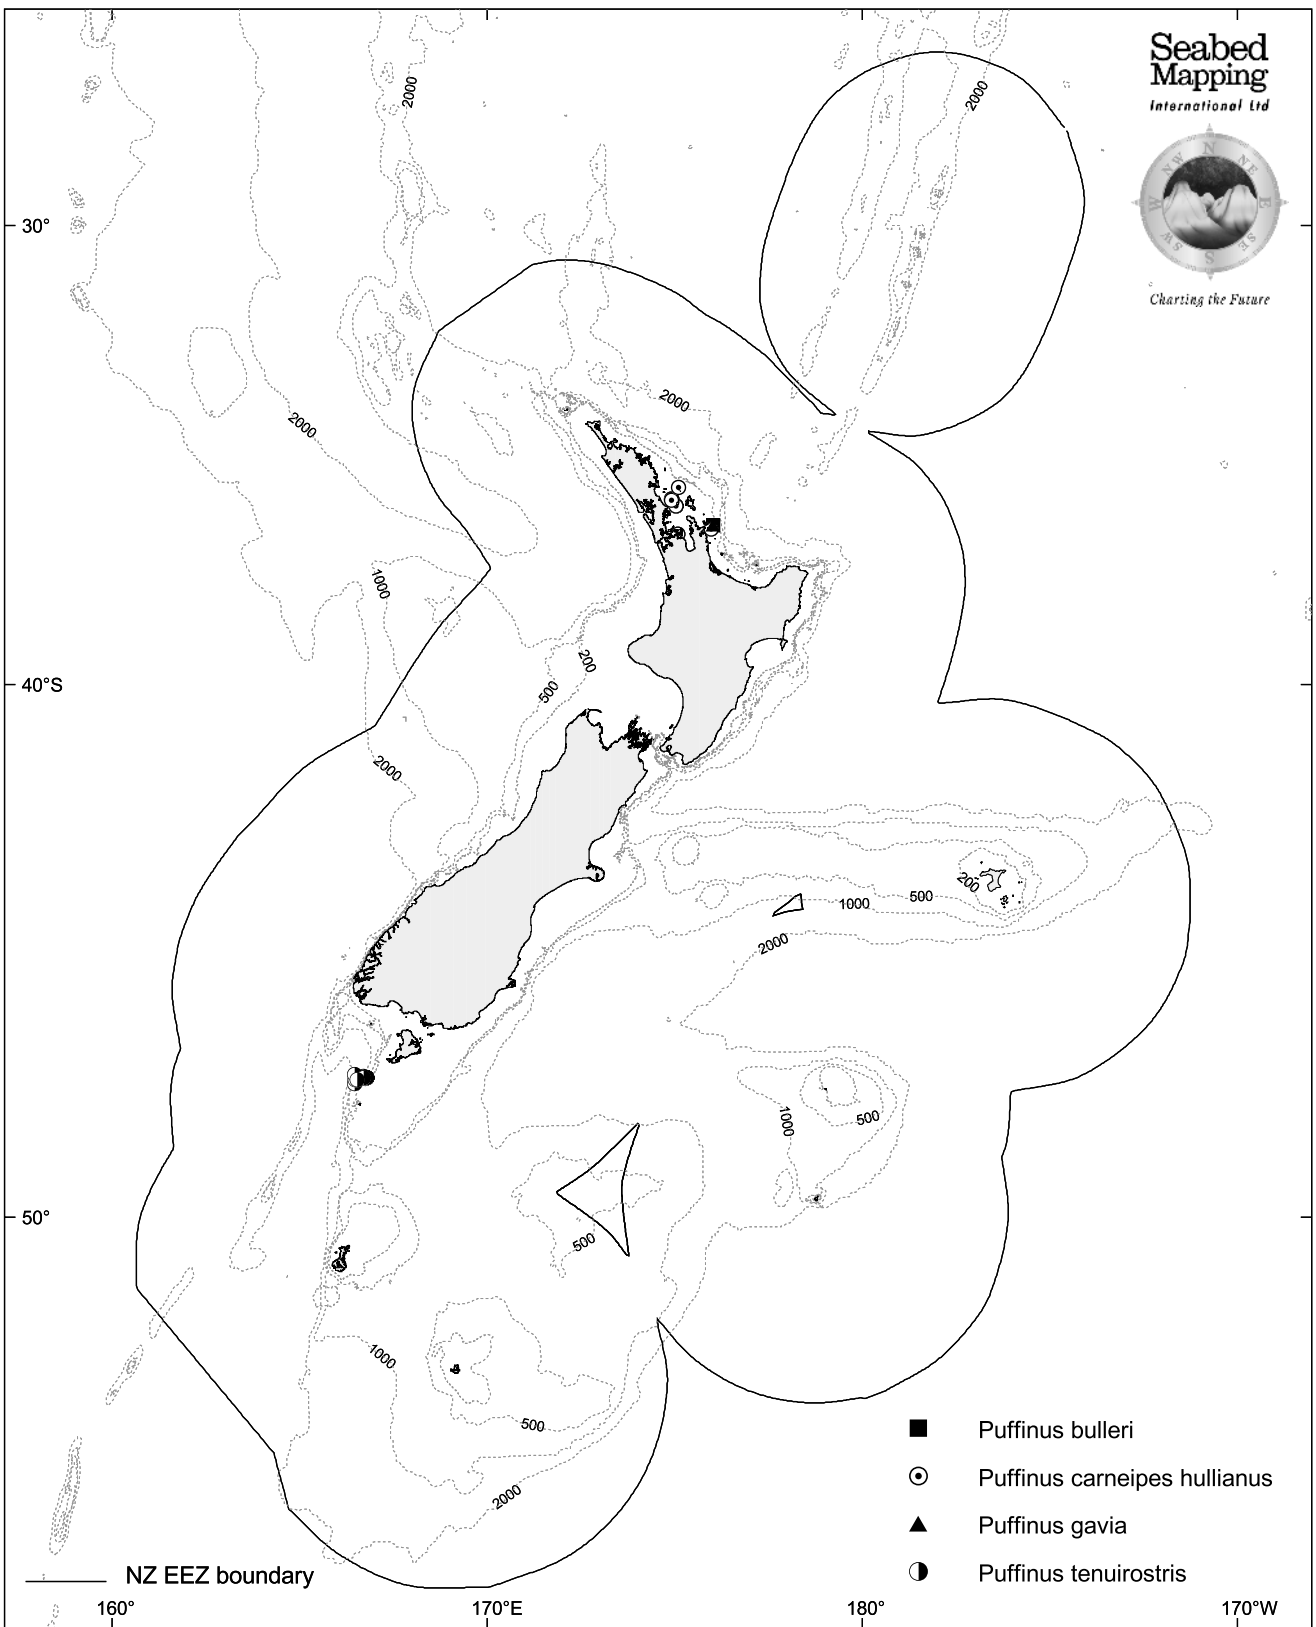

Figure 5. Catch locations during the period from 1 October 2000 to 30 September 2001, of four *Puffinus* taxa returned for autopsy.

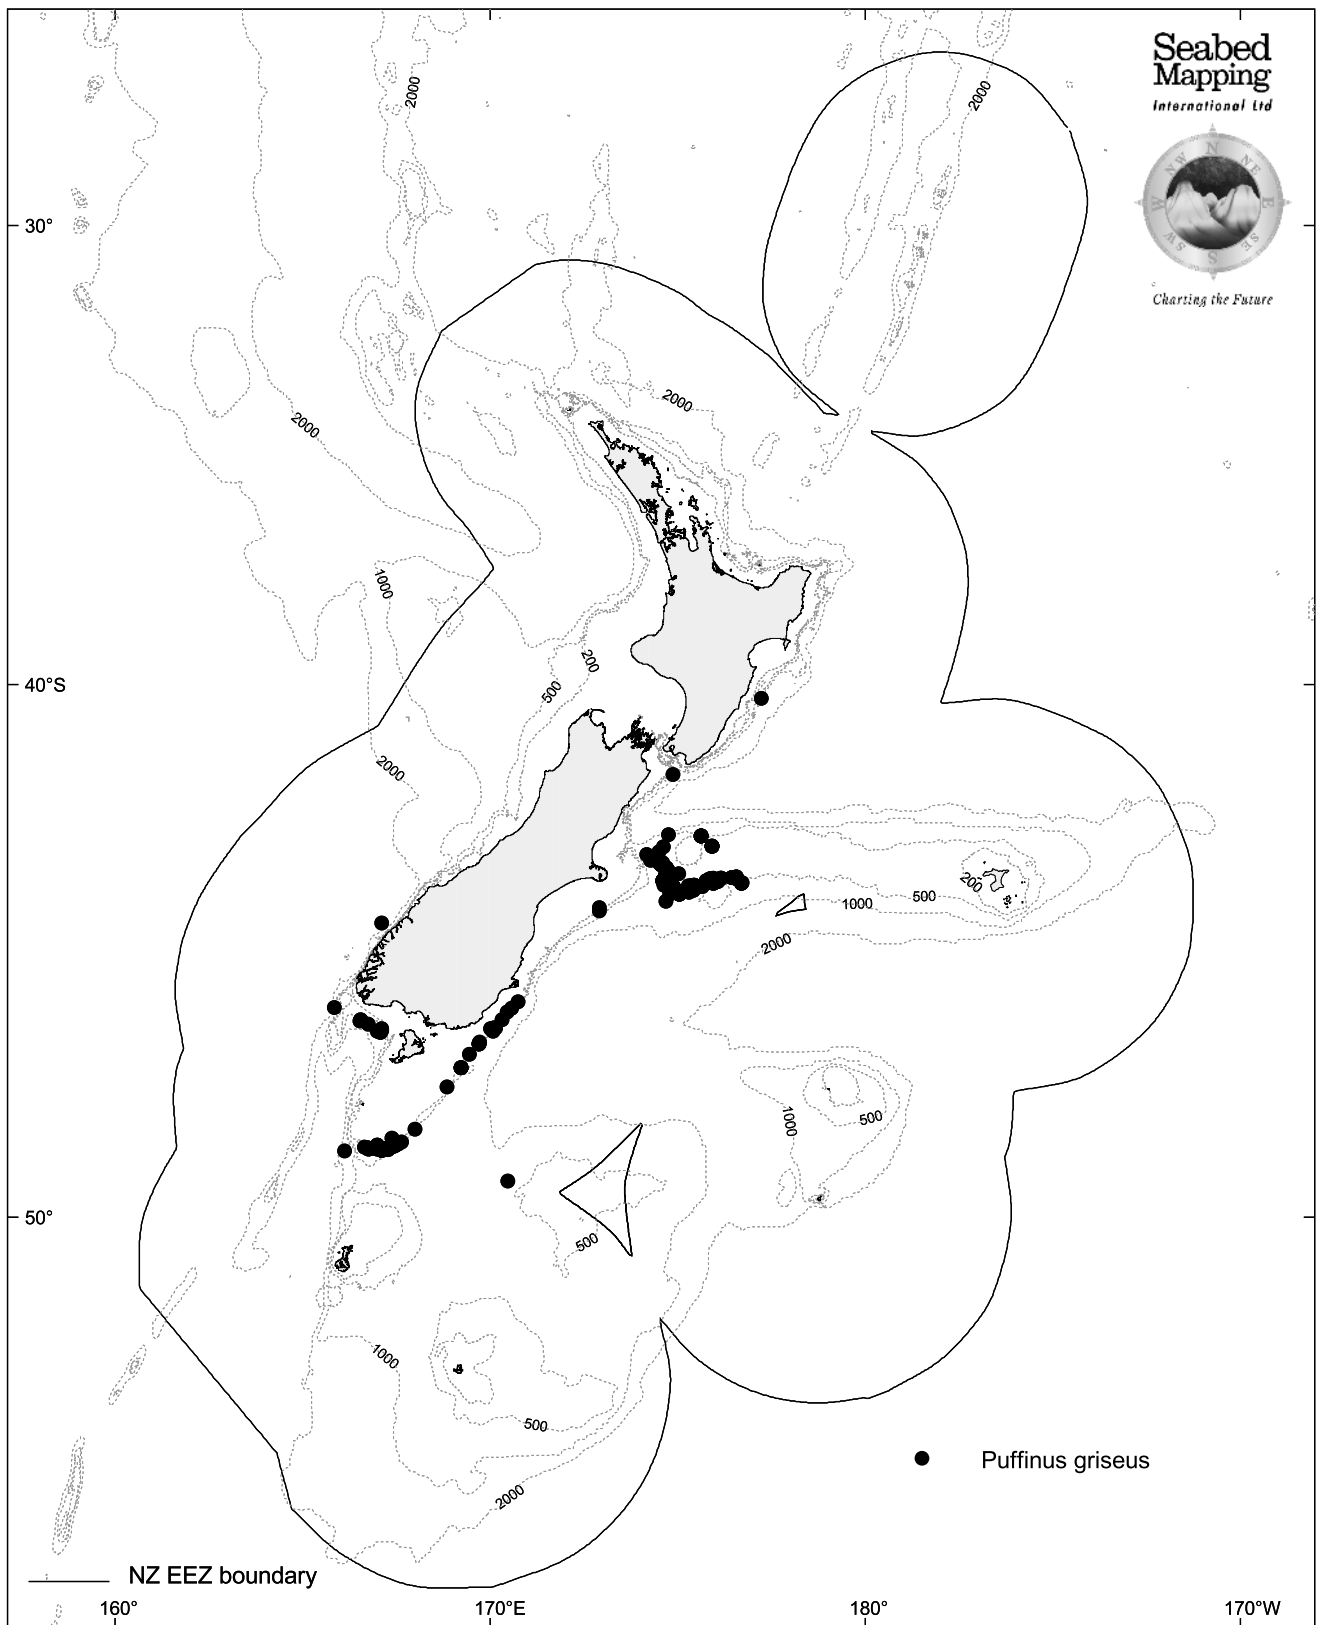

Figure 6. Catch locations during the period from 1 October 2000 to 30 September 2001, of *Puffinus griseus* returned for autopsy.

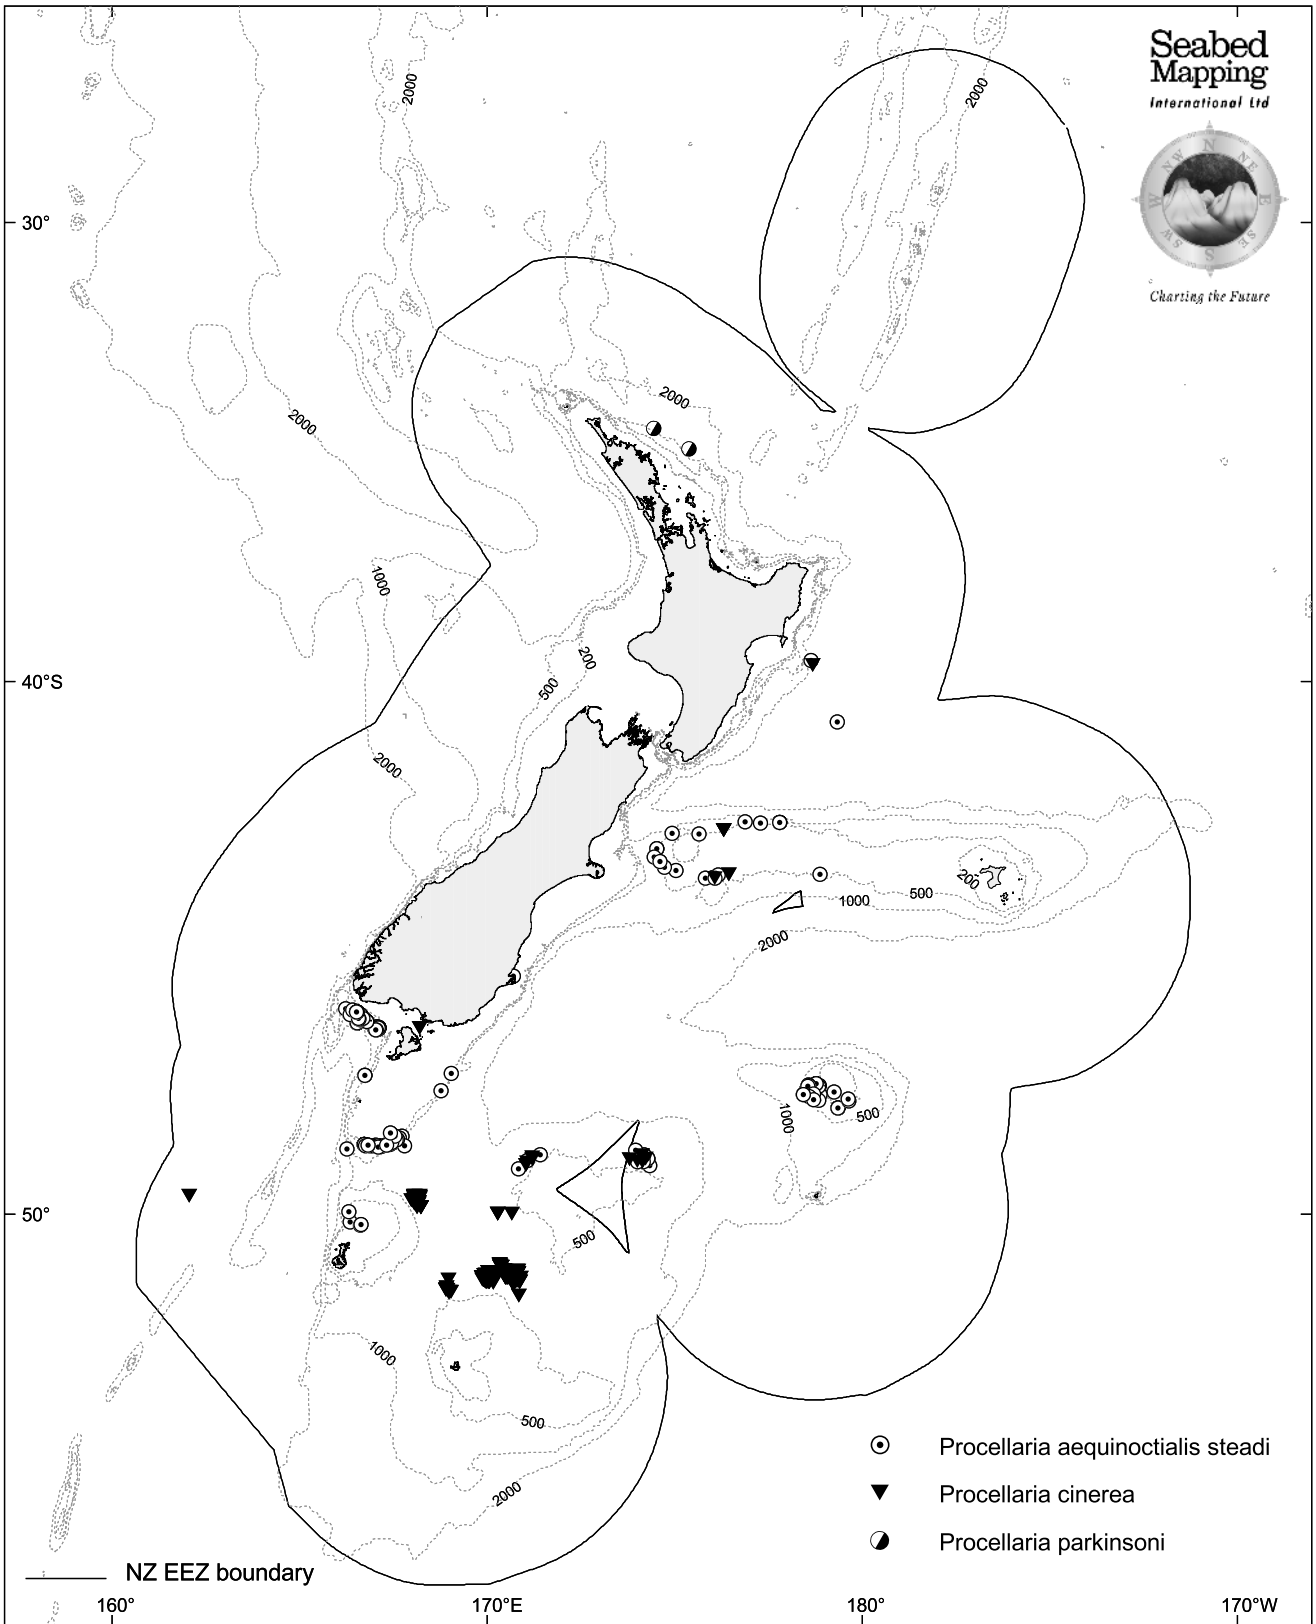

Figure 7. Catch locations during the period from 1 October 2000 to 30 September 2001, of three *Procellaria* taxa returned for autopsy.

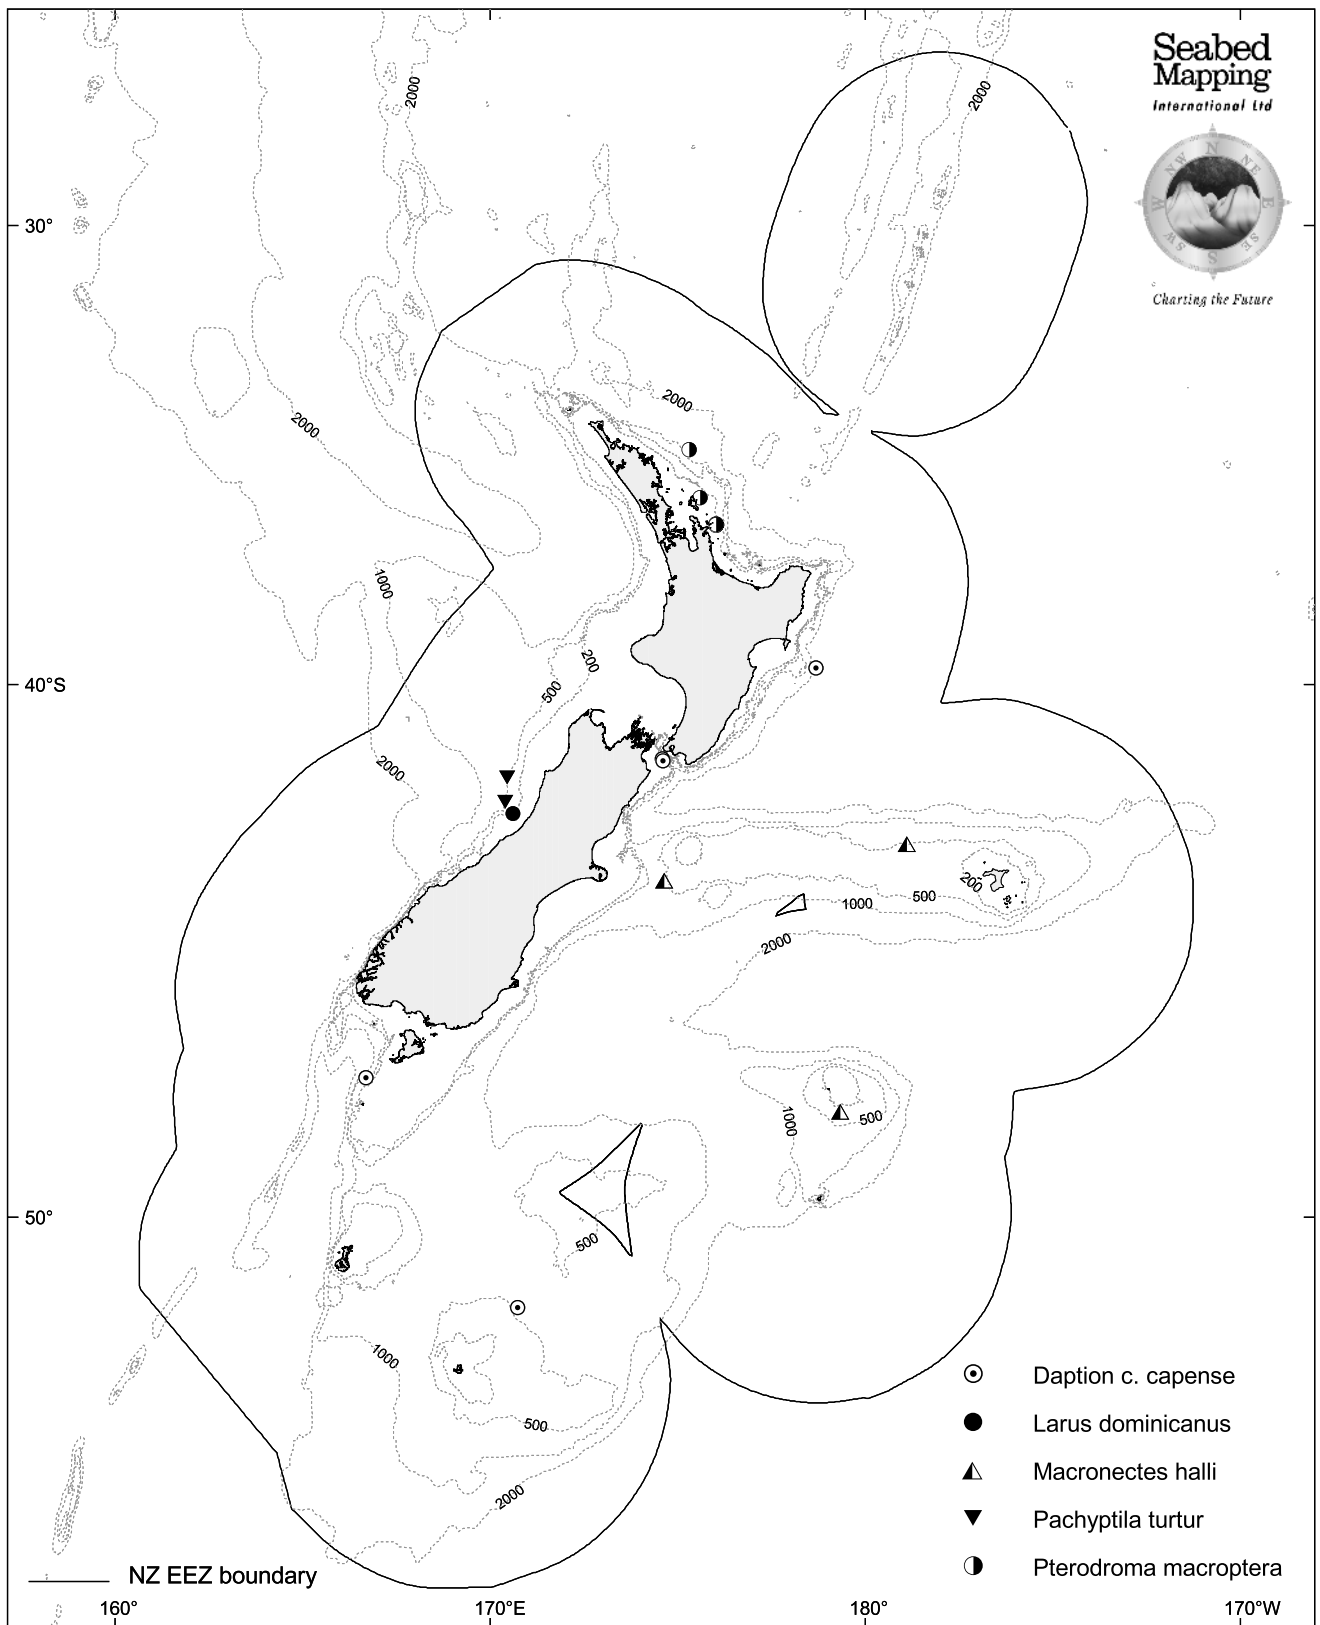

Figure 8. Catch locations during the period from 1 October 2000 to 30 September 2001, of *Macronectes*, *Daption*, *Pterodroma*, *Pachyptila*, and *Larus* returned for autopsy.

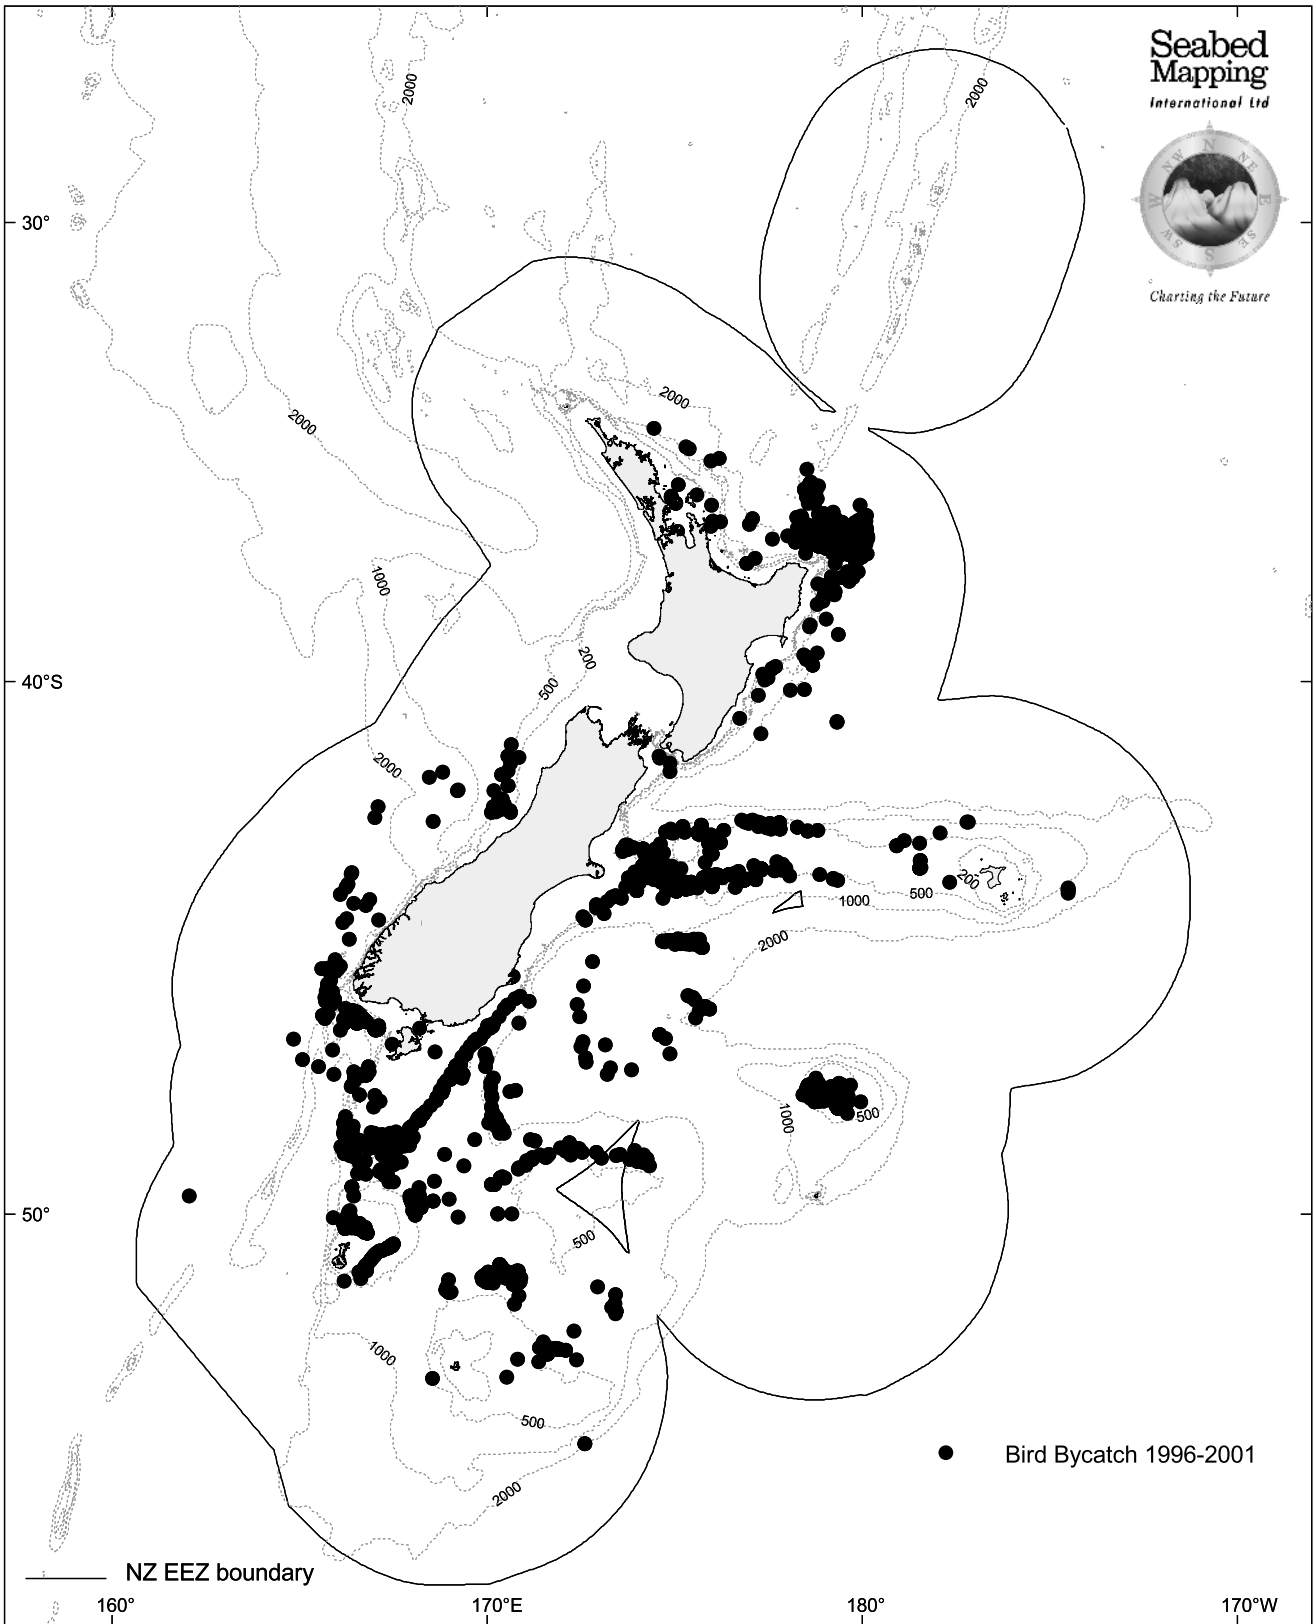

Figure 9. Catch locations of seabirds killed during the five year period from 1 October 1996 to 30 September 2001, and returned for autopsy from New Zealand fisheries.

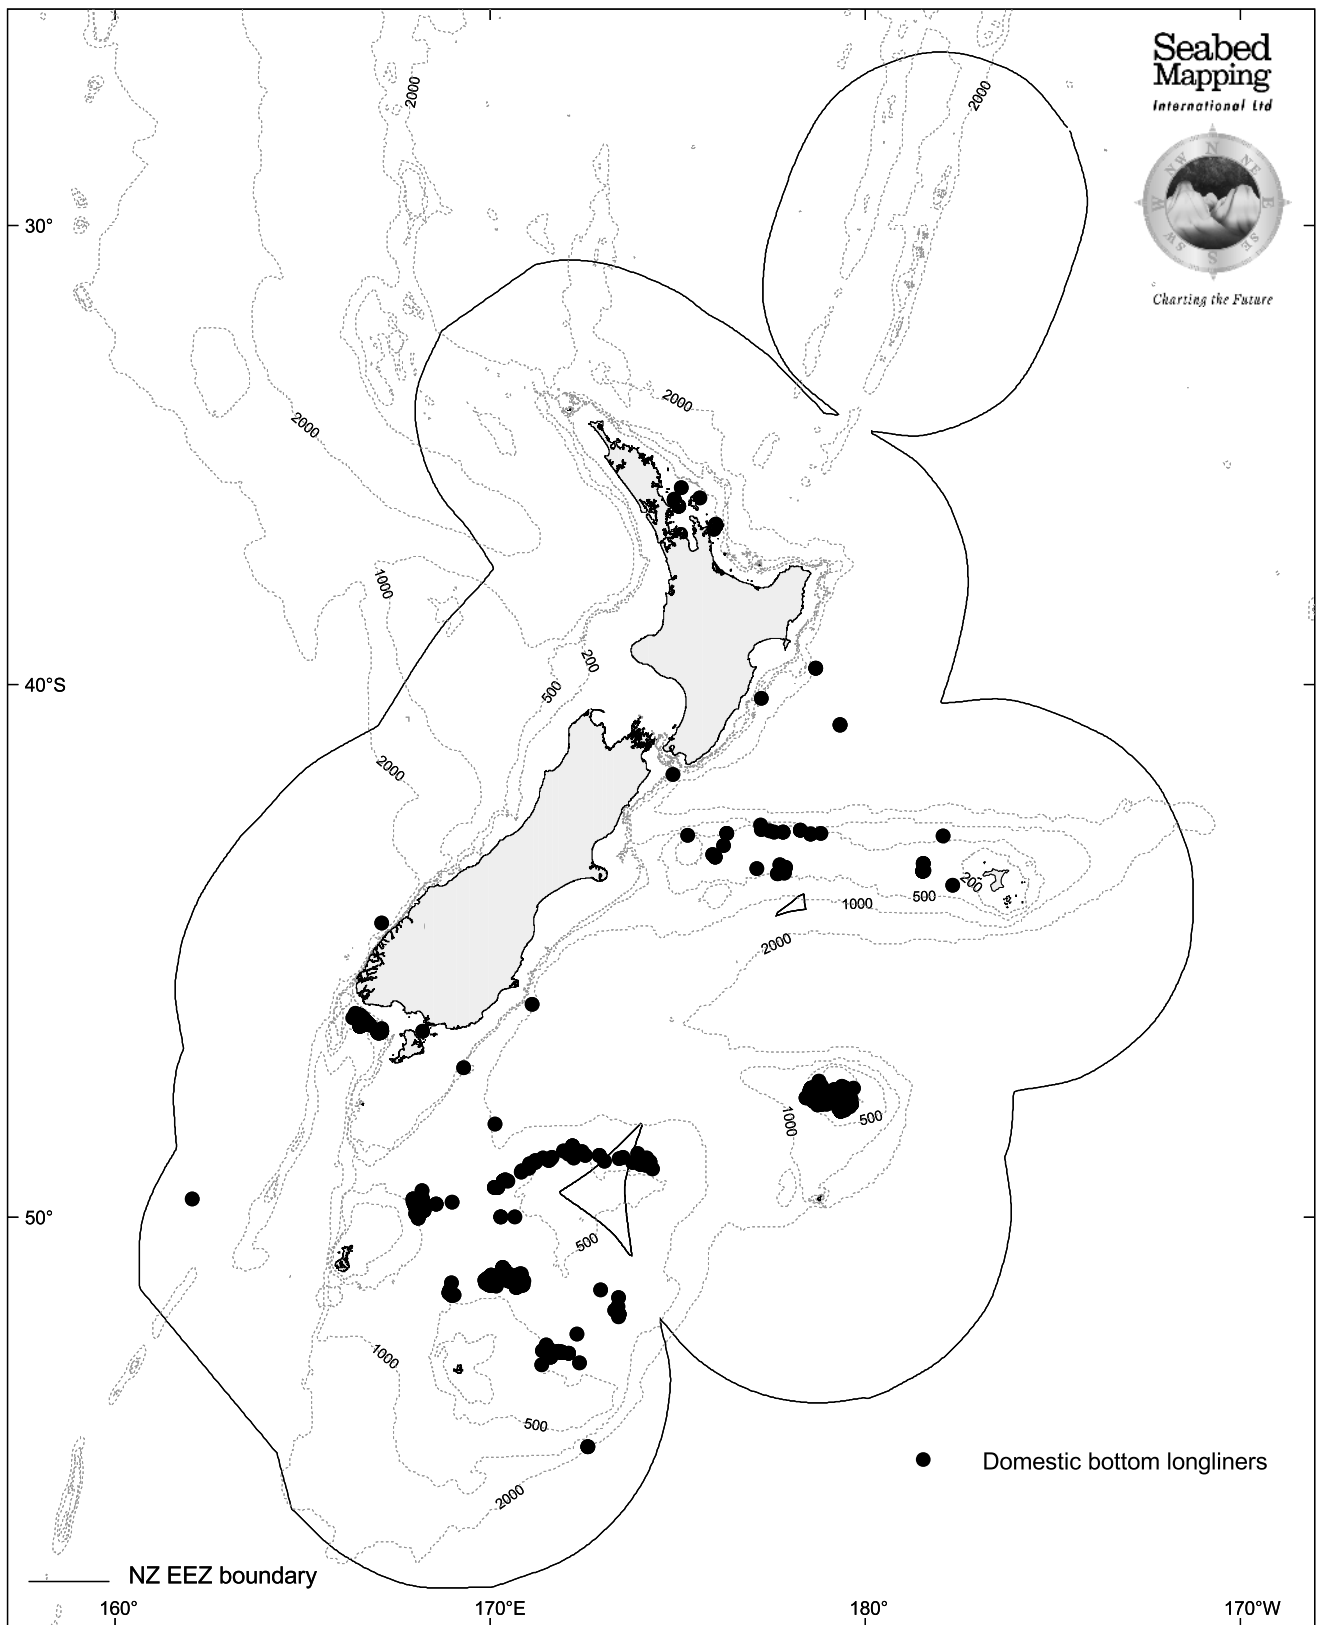

Figure 10. Catch locations of seabirds killed by Domestic Bottom Longliners during the five year period from 1 October 1996 to 30 September 2001, and returned for autopsy from New Zealand fisheries.

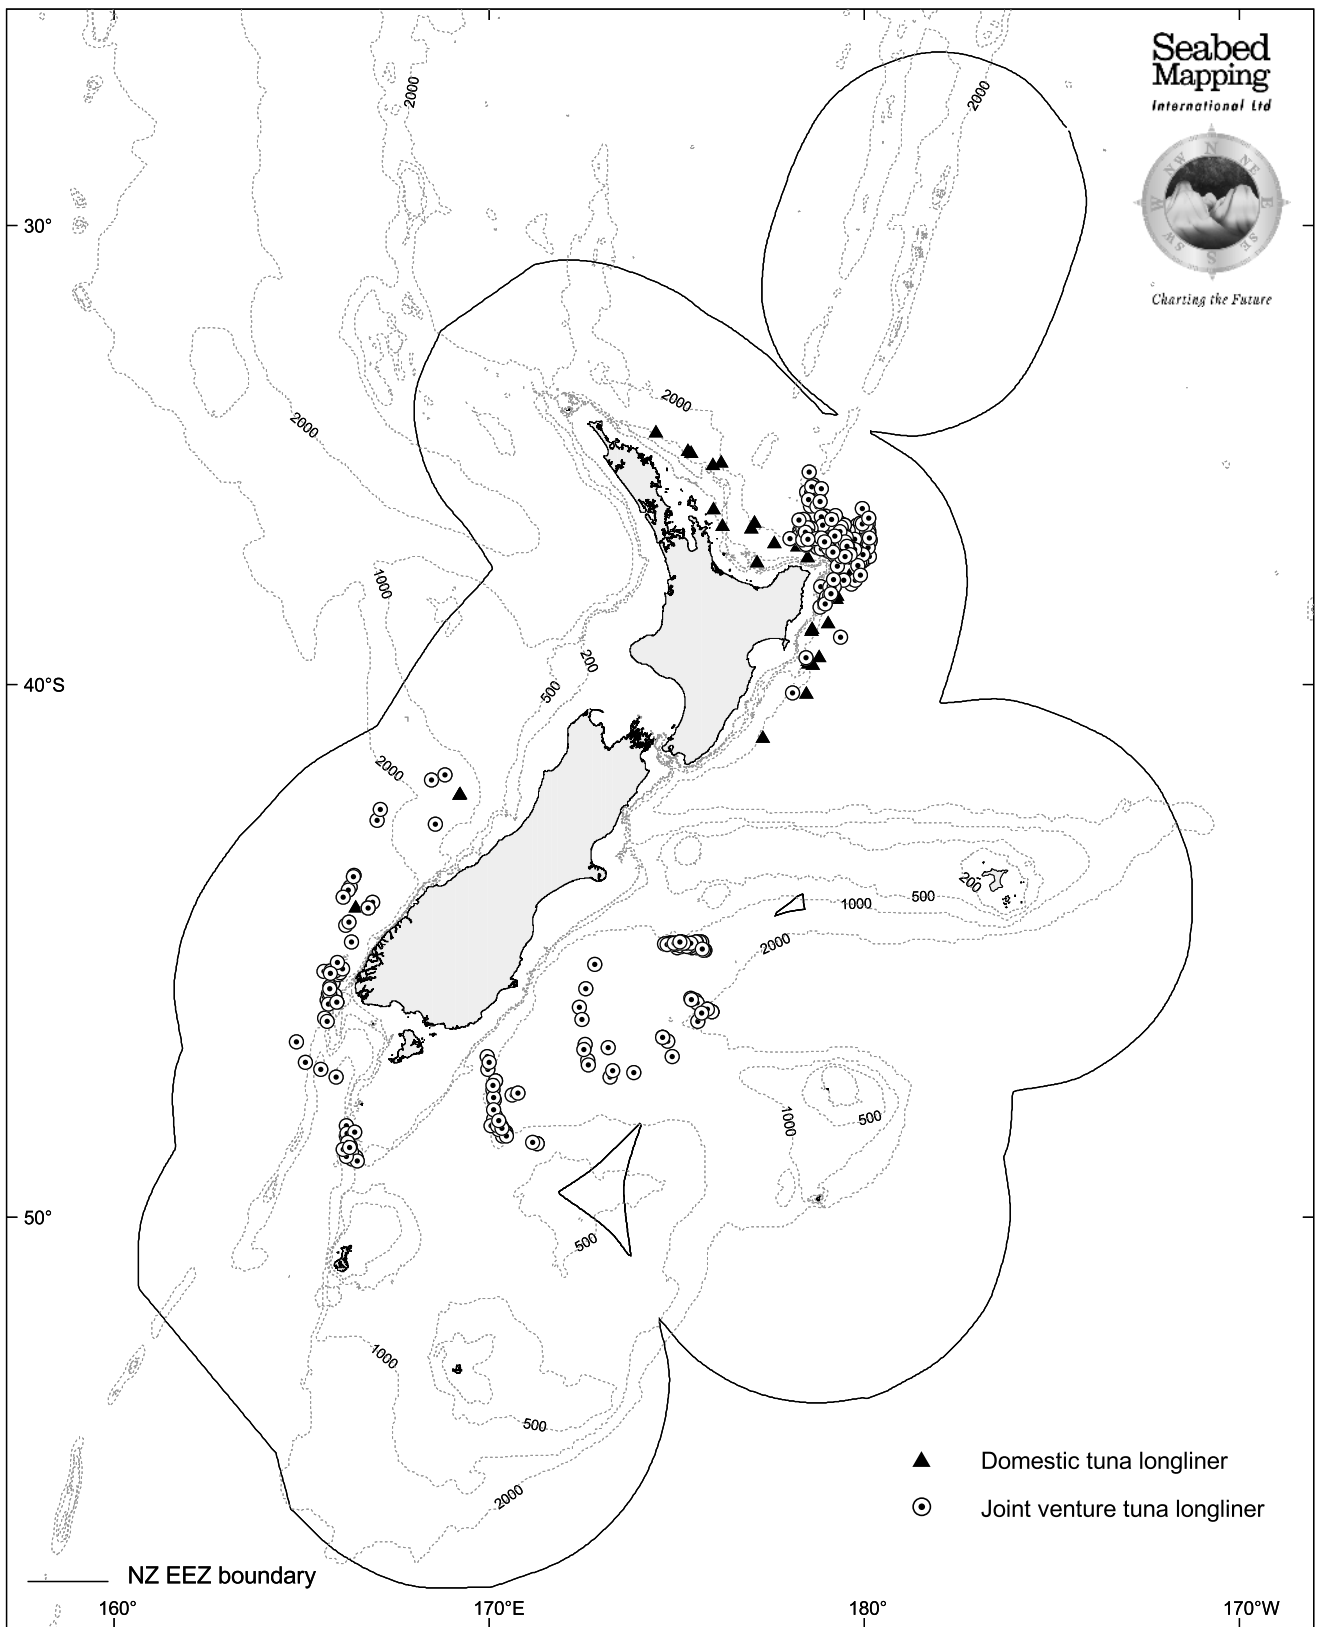

Figure 11. Catch locations of seabirds killed by Domestic and Joint-venture (chartered) Tuna Longliners during the five year period from 1 October 1996 to 30 September 2001, and returned for autopsy from New Zealand fisheries.

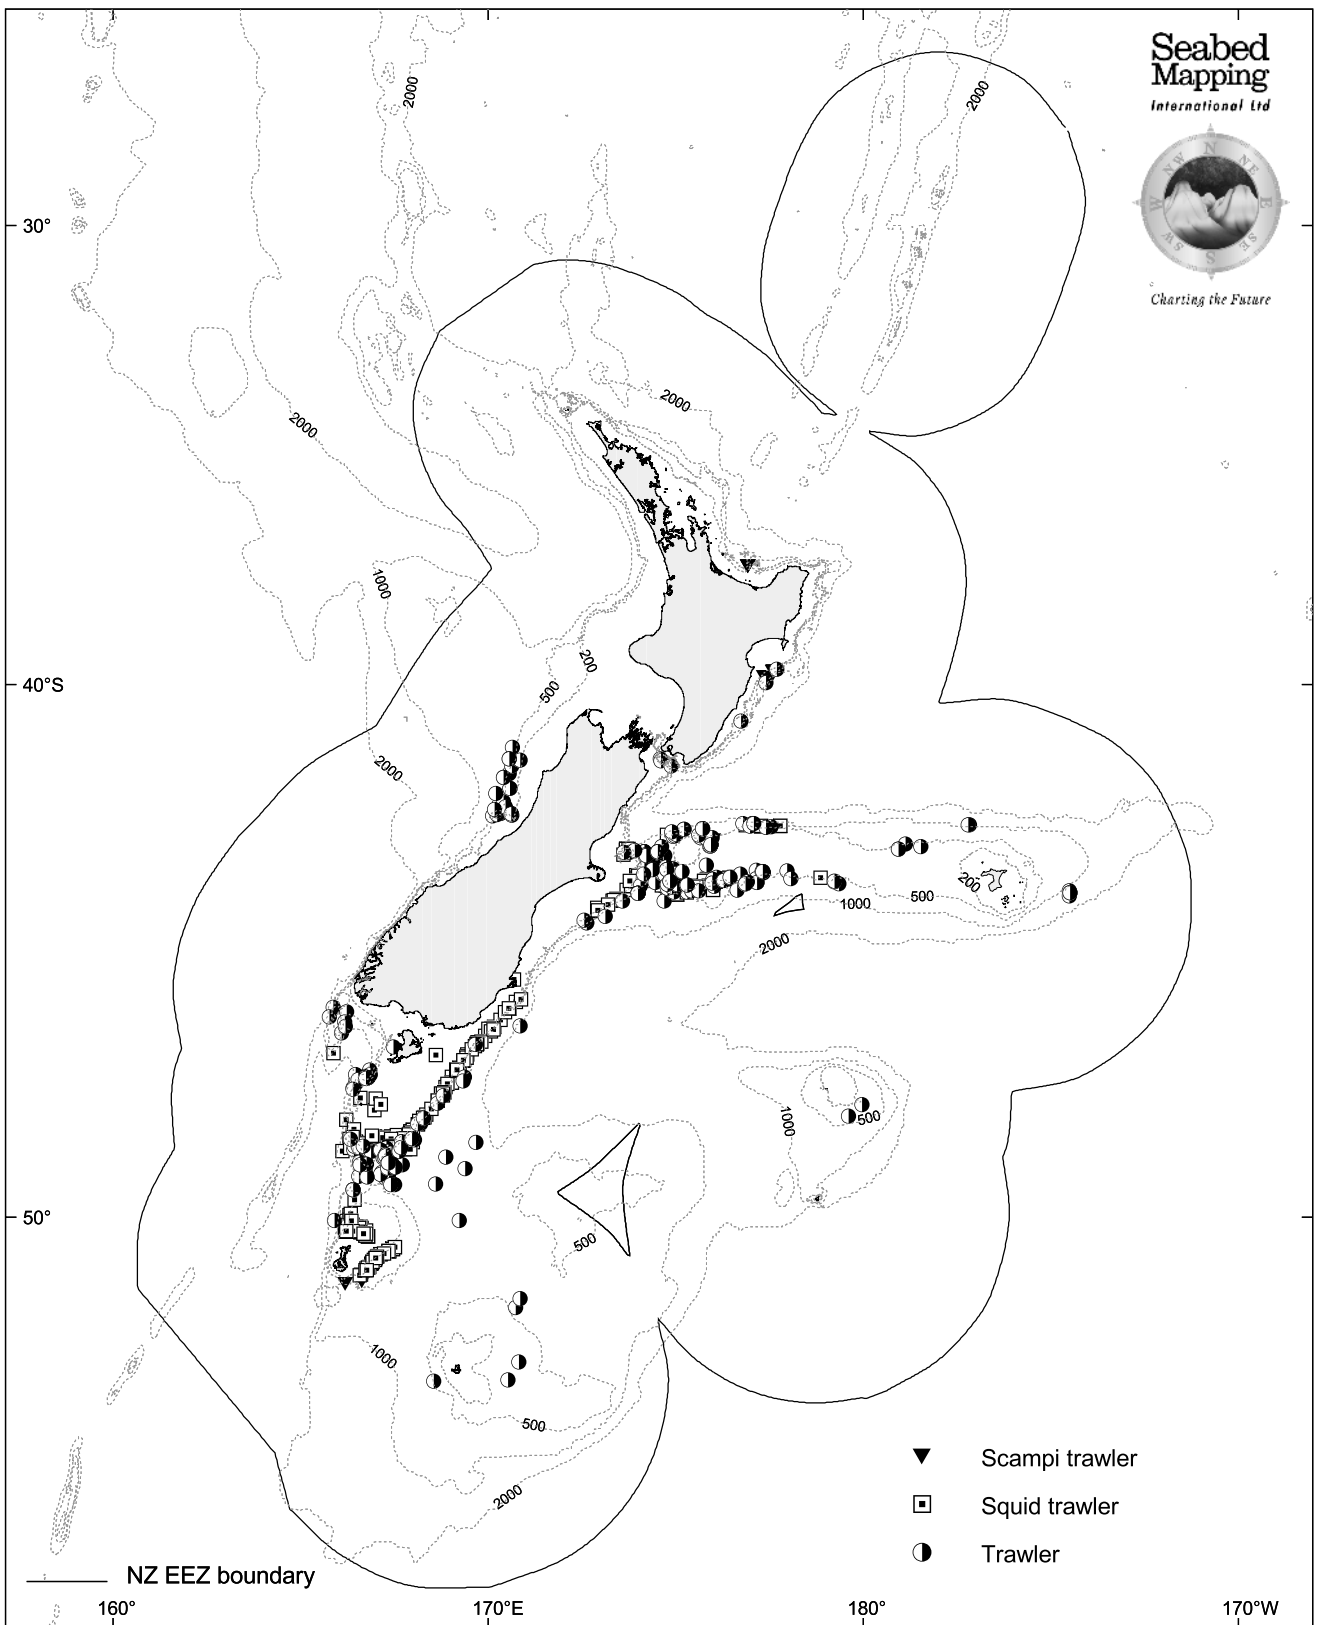

Figure 12. Catch locations of seabirds killed by Trawl fisheries during the five year period from 1 October 1996 to 30 September 2001, and returned for autopsy from New Zealand fisheries.

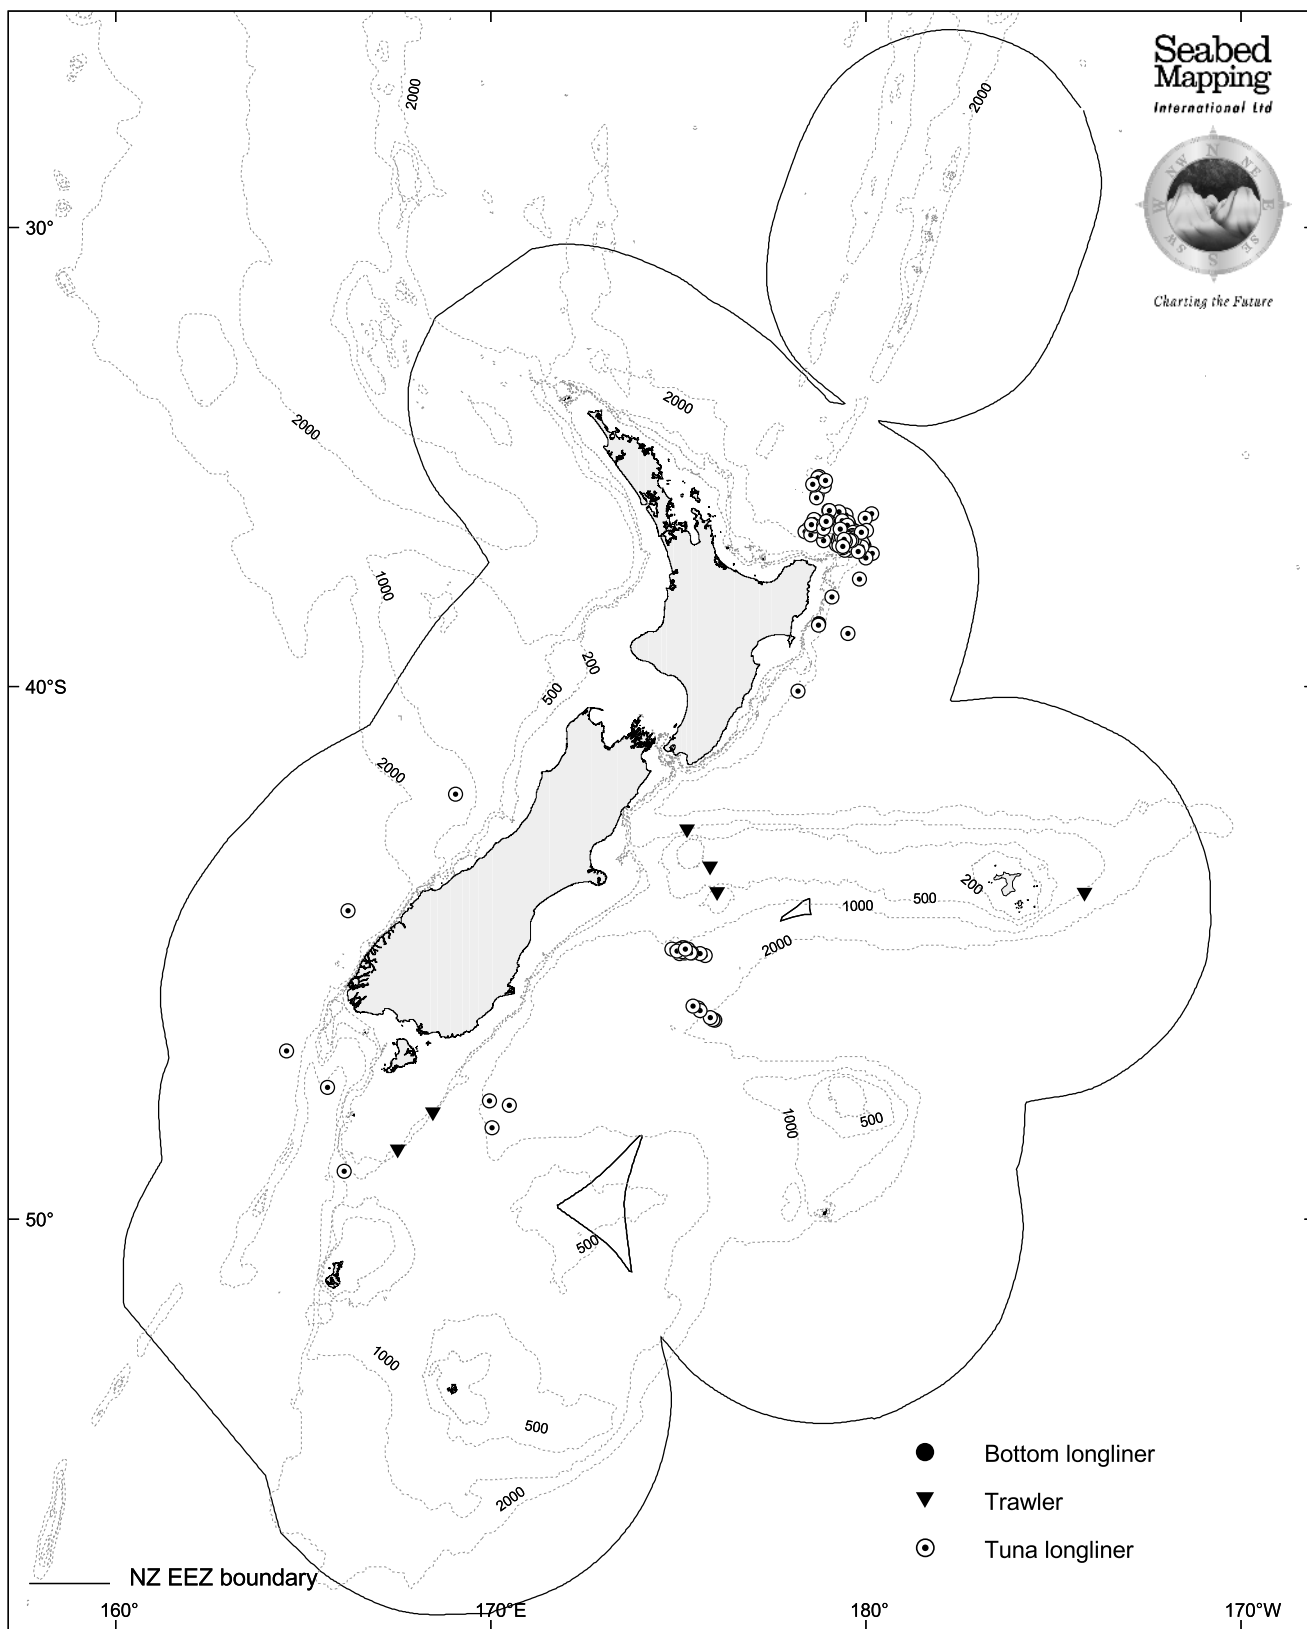

Figure 13. Catch locations during the five year period from 1 October 1996 to 30 September 2001, of *Diomedea* taxa returned for autopsy, according to type of fishery.

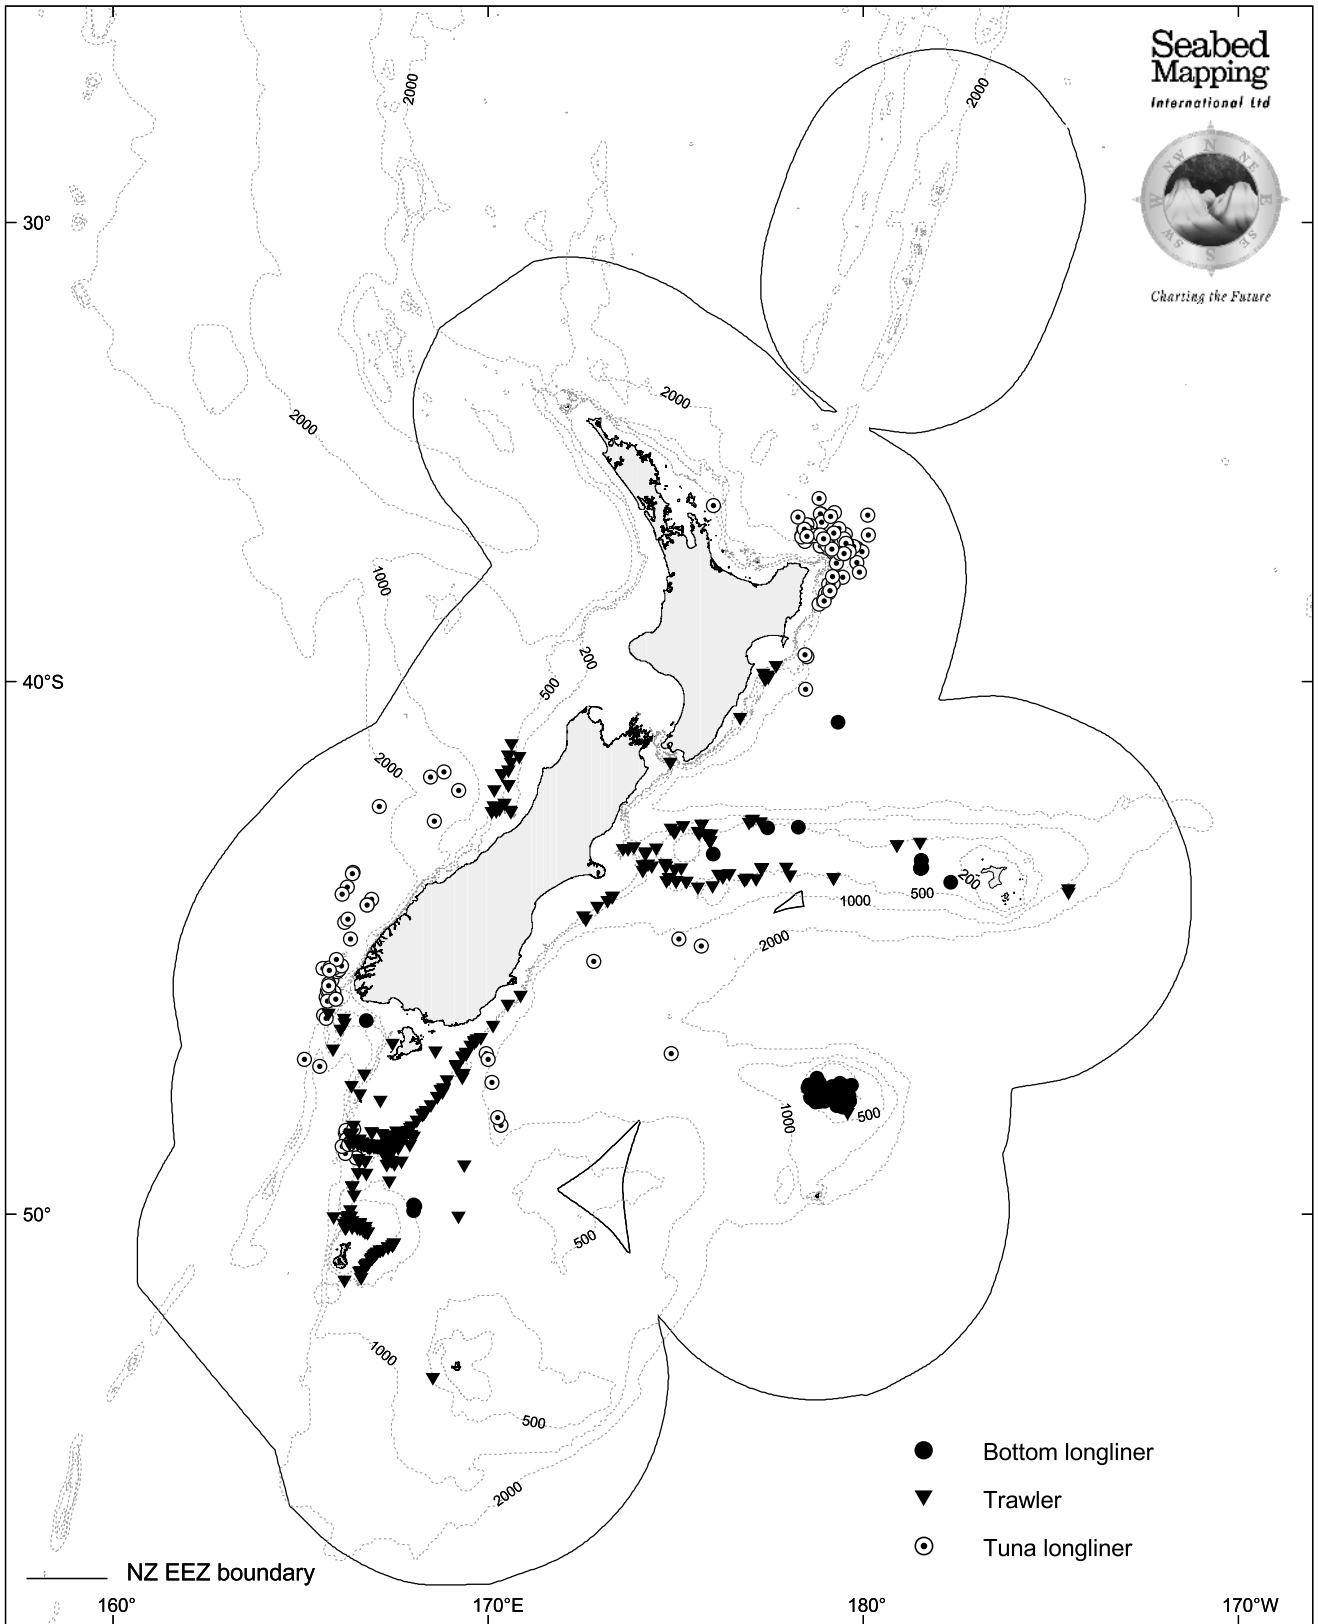

Figure 14. Catch locations during the five year period from 1 October 1996 to 30 September 2001, of *Thalassarche* taxa returned for autopsy, according to type of fishery.

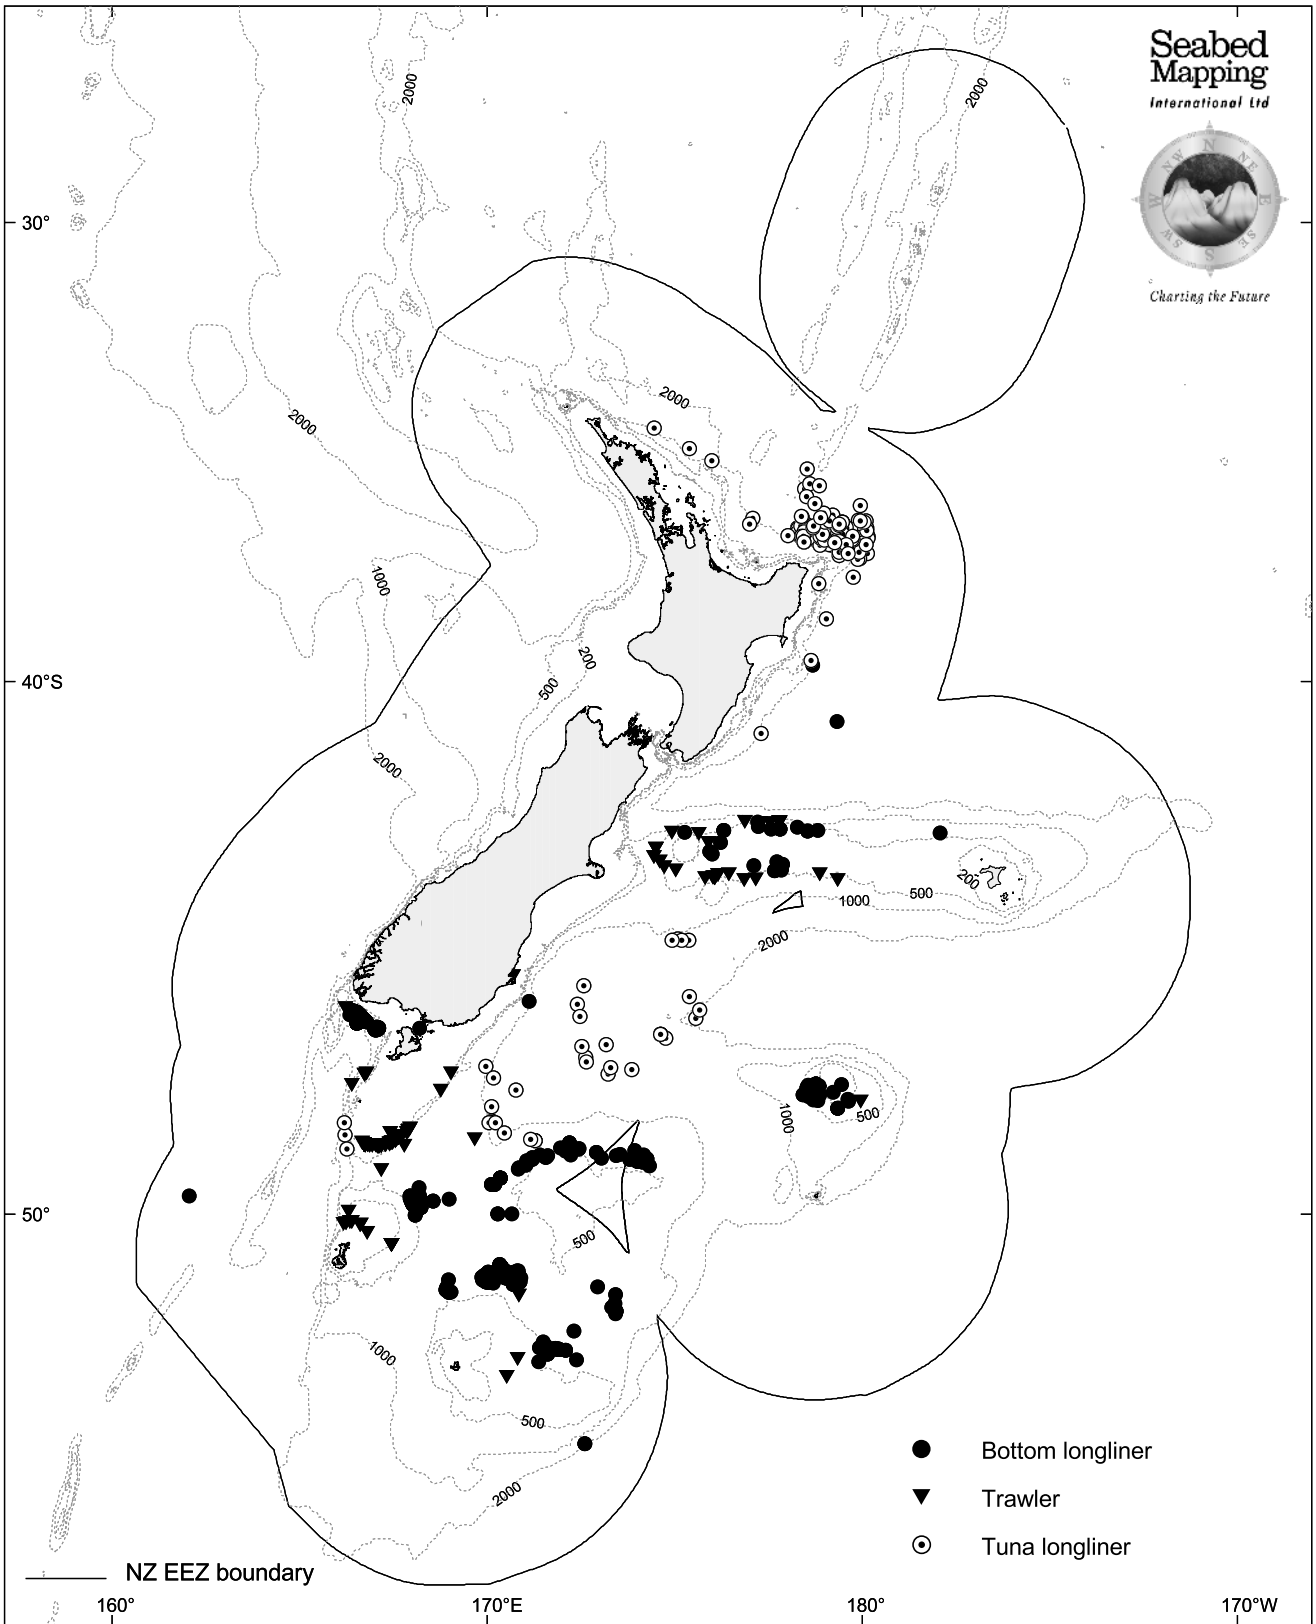

Figure 15. Catch locations during the five year period from 1 October 1996 to 30 September 2001, of *Procellaria* taxa returned for autopsy, according to type of fishery.

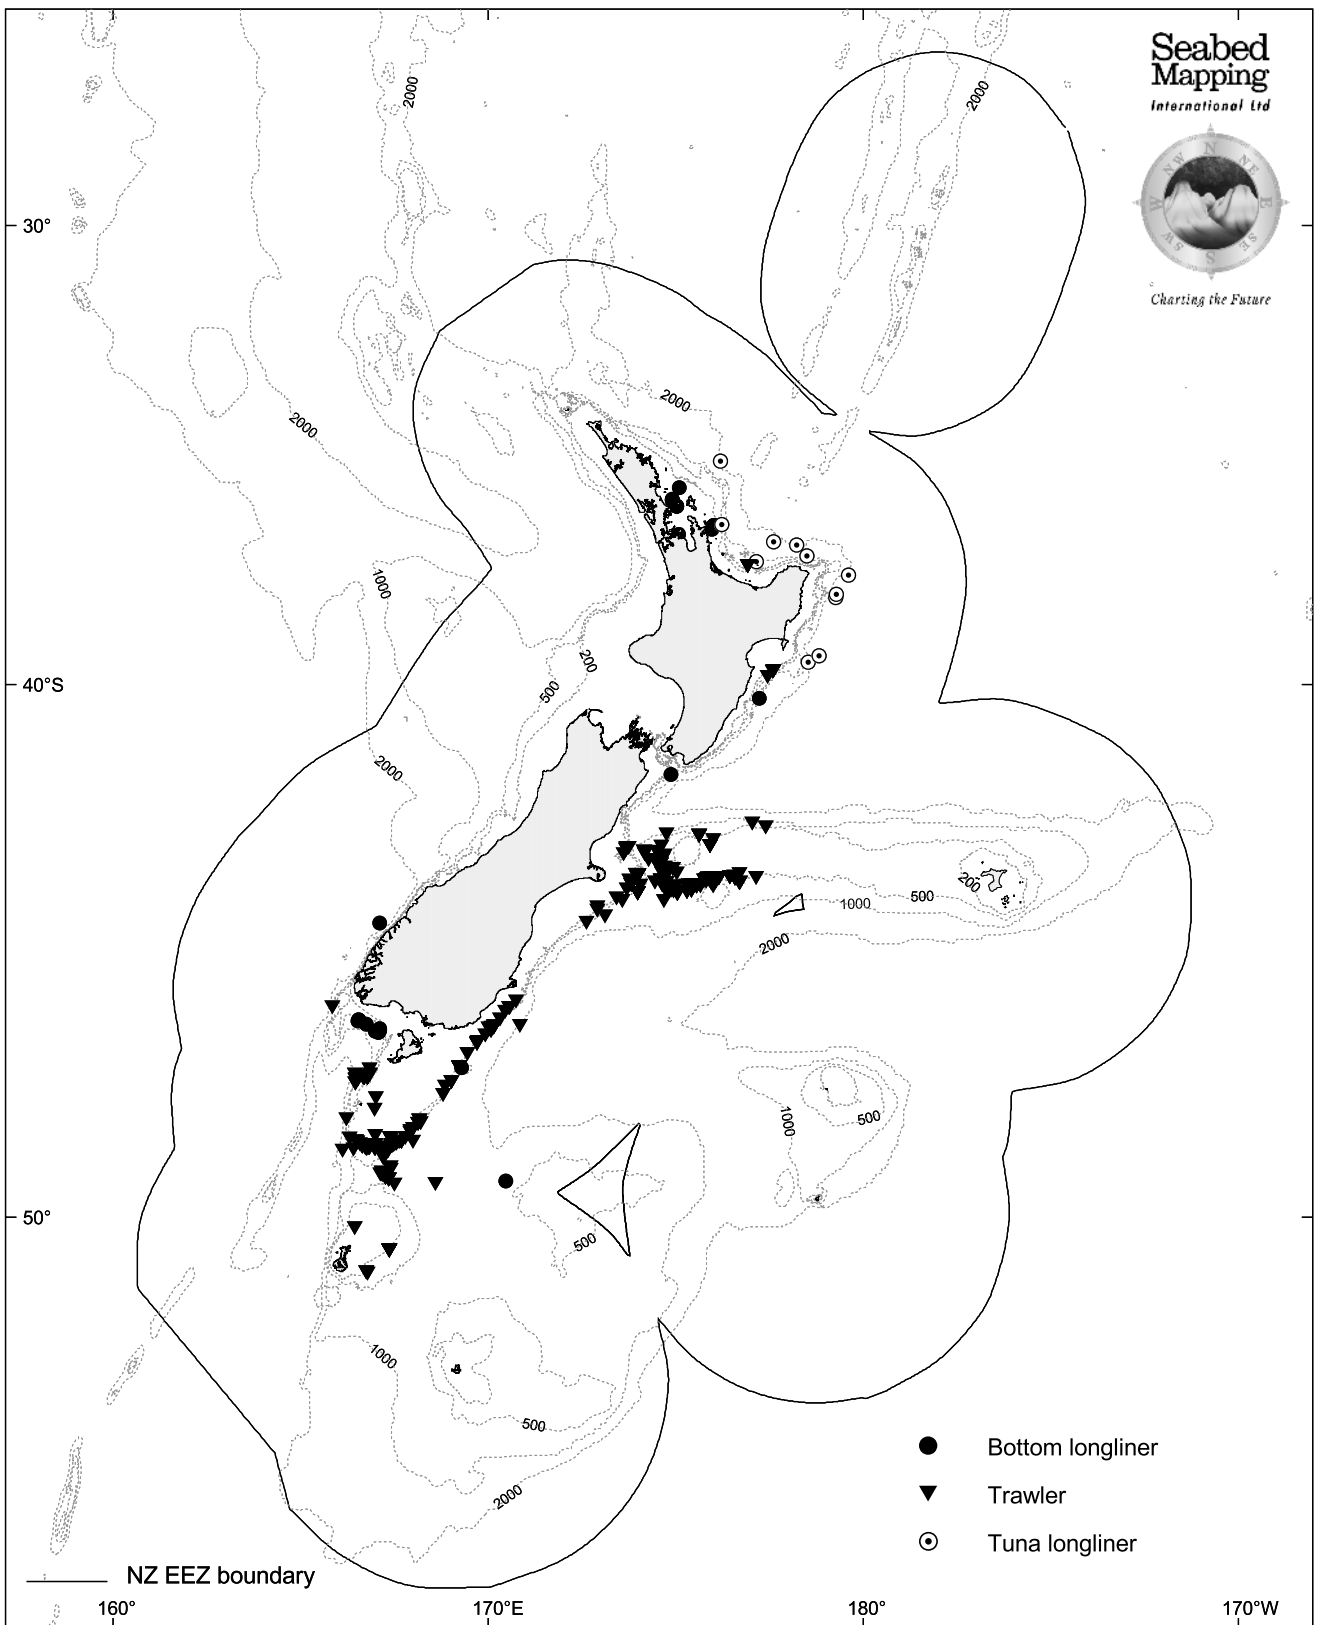

Figure 16. Catch locations during the five year period from 1 October 1996 to 30 September 2001, of *Puffinus* taxa returned for autopsy, according to type of fishery.
