

Photos 1-5 May 1998

Photo 1. Intact grass sward behind flax and toetoe which line the stream banks (Section B).

Photo 2. Tree ferns (*Dicksonia squarrosa*) growing between flax and toetoe along the stream.

Photo 3. Boundary of Sections B-C showing intact grass sward and some musk and watercress along the stream banks.

Photo 4. Looking down on Section G from Kinloch showing the flax and Toetoe 'wetland' created on pasture by DOC plantings in the early 1990s.

Photo 5. *Carex*-dominated stream banks at Section G.
