

# Conservation applications of measuring energy expenditure of New Zealand birds

Assessing habitat quality and costs of carrying radio  
transmitters

SCIENCE FOR CONSERVATION 214

Murray Williams (compiler)

Published by  
Department of Conservation  
P.O. Box 10-420  
Wellington, New Zealand

*Science for Conservation* is a scientific monograph series presenting research funded by New Zealand Department of Conservation (DOC). Manuscripts are internally and externally peer-reviewed; resulting publications are considered part of the formal international scientific literature. Titles are listed in the DOC Science Publishing catalogue on the departmental website <http://www.doc.govt.nz> and printed copies can be purchased from [science.publications@doc.govt.nz](mailto:science.publications@doc.govt.nz)

© Copyright January 2003, New Zealand Department of Conservation

ISSN 1173-2946

ISBN 0-478-22357-9

This publication originated from work done under Department of Conservation investigation no. 2419. It was prepared for publication by DOC Science Publishing, Science & Research Unit; editing and layout by Geoff Gregory. Publication was approved by the Manager, Science & Research Unit, Science Technology and Information Services, Department of Conservation, Wellington.

## CONTENTS

FOREWORD	
Murray Williams	7
POTENTIAL USE OF ENERGY EXPENDITURE OF INDIVIDUAL BIRDS TO ASSESS QUALITY OF THEIR HABITATS	
J.D. Godfrey	11
Abstract	11
<hr/>	
1. Introduction	12
<hr/>	
2. Defining good habitat	13
2.1 Using demographic measures	13
2.2 Why should good habitat be cheap to live in?	14
2.3 Fitness costs of energy expenditure	14
2.4 Relationship between fitness costs and energy expenditure	15
3. Relationship between energy expenditure and habitat quality	16
3.1 Life history stage	16
3.2 Form of the relationship between fitness costs and energy expenditure	17
3.3 Distribution of resources amongst individuals	18
3.4 Genetic heterogeneity	18
3.5 Predation risk	19
3.6 Parasites and pathogens	20
4. Conclusions	20
<hr/>	
5. References	21
<hr/>	
ENERGY EXPENDITURES OF NORTH ISLAND ROBINS IN HABITATS WITH DIFFERING PREDATOR DENSITIES	
J.D. Godfrey	25
Abstract	25
<hr/>	
1. Introduction	26
<hr/>	
2. Methods	26
2.1 Sites	27
2.2 Doubly labelled water technique	27
2.3 DLW field protocol	27
2.4 Environmental variables	28
2.5 Time budgets	28
2.6 Stuffed predator experiment	28

3.	Results	29
3.1	Blood sampling	29
3.2	Behaviour	29
3.3	Recapture	30
3.4	Energetics	30
3.5	Stuffed predator experiment	31
4.	Discussion	32
5.	Acknowledgements	34
6.	References	34

## ENERGETICS OF BLUE DUCKS IN RIVERS OF DIFFERING PHYSICAL AND BIOLOGICAL CHARACTERISTICS

J.D. Godfrey, D.M. Bryant, and Murray Williams 35

Abstract 35

1.	Introduction	36
2.	Methods	37
2.1	Sampling	37
2.2	Energetics	38
2.3	DLW field protocol	39
2.4	Radio-tracking	39
2.5	Time budgets	41
2.6	Environmental variables	41
2.7	Analysis	41
3.	Results	42
3.1	Energy expenditure	42
3.2	Habitat quality	43
3.3	Territory size	44
3.4	Body condition	45
3.5	Energy expenditure in relation to habitat	48
3.6	Time budgets	51
4.	Discussion	52
4.1	Energy expenditure and territory size	52
4.2	Effects of altitude	54
4.3	Territory economics	55
4.4	Behaviour	58
4.5	Individual quality and territory size	59
4.6	Body condition	59
4.7	Flow regulation	61
4.8	Adult survival	62
4.9	Study scope	62

5.	Management implications	63
6.	Acknowledgements	64
7.	References	65

EFFECT OF RADIO TRANSMITTERS ON ENERGY EXPENDITURE OF TAKAHE		
J.D. Godfrey and D.M. Bryant		69

Abstract	69
----------	----

1.	Introduction	70
2.	Methods	71
2.1	Energy expenditure	71
2.2	Behaviour	72
2.3	Analysis	73
3.	Results	73
3.1	Energy expenditure	73
3.2	Behaviour	76
4.	Discussion	76
4.1	Tag effects	76
4.2	Heat loss	78
5.	Conclusions	78
6.	Acknowledgements	79
7.	References	80

EFFECTS OF RADIO TRANSMITTERS: REVIEW OF RECENT RADIO-TRACKING STUDIES		
J.D. Godfrey and D.M. Bryant		83

Abstract	83
----------	----

1.	Introduction	84
2.	Methods	84
3.	Results	86
4.	Discussion	91
4.1	Reporting bias	91
4.2	Phylogenetic bias	92
4.3	Power of tests	92
5.	References	95
