

Mitigation

CSP RAG 11 Mar 2014

Protected species newsletter

- Review of MIT2012-05 underway
- Scope and content to be determined following review

Inshore BLL – tori lines

- Develop effective and practical tori line specifications suitable for inshore bottom longline vessels
- Target those fisheries contributing high risk to seabirds, particularly inshore snapper

Inshore BLL – seabird liaison

- Liaison officers visit vessels in FMA1 to follow up on progress from last year
- Extend to other areas?

Humpback whales entanglement

- Avoidance and safe release from pot line and setnet entanglement (industry project underway?)

Gaps

- Project ideas?

Prioritisation guidance using CSP principles
